

3 TWO DIMENSIONAL MOTION

1. The location of a particle in space is identified by a position vector \vec{r} directed from the origin O to a point P .

$$\vec{r} = x\hat{i} + y\hat{j} + z\hat{k} \quad (3.1)$$

In this expression, $x\hat{i}$, $y\hat{j}$, $z\hat{k}$ are the vector components and x , y , z are the scalar components of the particle's position vector \vec{r} .

2. The movement of a particle from position vector \vec{r}_i to position vector \vec{r}_f is identified by a displacement vector $\Delta\vec{r}$.

$$\Delta\vec{r} = \vec{r}_f - \vec{r}_i \quad (3.2)$$

In this expression, the subscripts i and f stand for initial and final respectively. The position vector can also be written as

$$\Delta\vec{r} = (x_f - x_i)\hat{i} + (y_f - y_i)\hat{j} + (z_f - z_i)\hat{k} \quad (3.3)$$

or as

$$\Delta\vec{r} = \Delta x\hat{i} + \Delta y\hat{j} + \Delta z\hat{k} \quad (3.4)$$

where (x_i, y_i, z_i) are the coordinates of position vector \vec{r}_i and (x_f, y_f, z_f) are the coordinates of position vector \vec{r}_f .

3. The displacement $\Delta\vec{r}$ of a particle during a time interval Δt is the particle's average velocity \vec{v}_{avg} .

$$\vec{v}_{avg} = \frac{\Delta\vec{r}}{\Delta t} \quad (3.5)$$

4. The instantaneous velocity \vec{v} is the limit of the average velocity as Δt approaches zero.

$$\vec{v} = \lim_{\Delta t \rightarrow 0} \frac{\Delta\vec{r}}{\Delta t} = \frac{d\vec{r}}{dt} \quad (3.6)$$

The instantaneous velocity \vec{v} can also be written in unit-vector notation as

$$\vec{v} = v_x\hat{i} + v_y\hat{j} + v_z\hat{k} \quad (3.7)$$

where $v_x = dx/dt$, $v_y = dy/dt$, and $v_z = dz/dt$. A particle's instantaneous velocity \vec{v} is the rate of change of its position vector \vec{r} . The magnitude of the particle's instantaneous velocity \vec{v} is the speed, and its direction is always tangent to its path at that position.

5. The change in a particle's instantaneous velocity $\Delta\vec{v}$ during a time interval Δt is its average acceleration \vec{a}_{avg} .

$$\vec{a}_{avg} = \frac{\Delta\vec{v}}{\Delta t} \quad (3.8)$$

Dear non believer I like that when the infuriating alarm clock yells Wake up theres a challenge waiting for you today rousing you from a pleasant dream you do not smash it You simply slap the off button and head to work Lets establish this Your boss doesnt care how you view your alarm clock He or she only cares that you show up at work on time with a smile on your face Saying Scientists have figured it out There is no god and there is no need for one is common nowadays to counter Christians Muslims and Jews who turn up saying Wake up atheist Theres a challenge waiting for you in the afterlife Unfortunately that response can be illogical Ask any scientist Is the scientific community sure there is no creator and the likely answer will be No we are only about 99% sure Anyone could be wrong as Richard Dawkins said The common response makes you a 1% gambler and frames you as defending personal conclusions instead of facts It makes sense to defend statements such as that DNA decides biological characteristics such as eye and skin color and that chimps are our biological cousins because these are facts However defending the statement There is no creator after reading Adams story has nothing to do with defending facts The only fact in the Adam story is that if we have a creator he paid no attention to science while introducing himself to our ancestors Instead he preferred to focus on teaching them how to overcome the challenges of life There are atheists who believe in science but do not use it as the base of their arguments they say We dont care when there is no evidence Be careful using this kind of reasoning It is true that sometimes the problem is that there is no evidence But sometimes the problem is that there is no desire to see the evidence There is a story about a police officer who released a murderer despite having video of him committing the crime What was the officers rationale for dismissing the evidence you might ask It was made by the victim Maybe the difference is little between the police officer and atheists who label the books in which the Abraham story and the Mary story are written as man made rather than possible evidence or product of divine intervention The troubling situation if youll allow me to call it so is easy to solve Do you remember what we established about your boss Think about it The creator if he does exist should not be less understanding or less open minded than your boss So what if you view todays Christians Muslims and Jews as infuriating alarm clocks What you should care about is leaving this world with a wide confident smile similar to the smile of a confident employee when he or she says Good morning to their colleagues and boss I am aware that you dont deem books worth reading unless their titles are such as God Is Not Great or

God Is So Bad but I kindly ask you to make an exception I want to draw that confident smile on your face Considering the ignorance of contemporary Christians Muslims and Jews nothing should be easier than drawing that smile Always remember that there is 1% probability that a creator does exist It is not good form for you to look disoriented if the Creator says to you Okay numb skull I appreciate your refusal to be a Christian a Muslim or a Jew but tell me Why did you think I was less understanding and open minded than your boss Have I not made from an atheist a role model for you What more did you want from me Also tell me why you have released me although I left in your hands books in which I admitted committing crimes against your kind **Pynchon Notes** ,1990 **Science and Art of Mining** ,1921 *Essentials of gynecology* Edwin Bradford Cragin,1891 *The Bookseller* ,1907 Official organ of the book trade of the United Kingdom Notes on books Longmans, Green and co,1909 **Oxford Studies in Ancient Philosophy, Volume 52** Victor Caston,2017-08-11 Oxford Studies in Ancient Philosophy is a volume of original articles on all aspects of ancient philosophy The articles may be of substantial length and include critical notices of major books OSAP is now published twice yearly in both hardback and paperback Have you seen the latest OSAP is what scholars of ancient philosophy say to each other when they meet in corridors or on coffee breaks Whether you work on Plato or Aristotle on Presocratics or sophists on Stoics Epicureans or Sceptics on Roman philosophers or Greek Neoplatonists you are liable to find OSAP articles now dominant in the bibliography of much serious published work in your particular subject not safe to miss Malcolm Schofield Cambridge University OSAP was founded to provide a place for long pieces on major issues in ancient philosophy In the years since it has fulfilled this role with great success over and over again publishing groundbreaking papers on what seemed to be familiar topics and others surveying new ground to break It represents brilliantly the vigour and the increasingly broad scope of scholarship in ancient philosophy and shows us all how the subject should flourish M M McCabe King s College London **Lovejoy's College Guide** ,1993 *The Bibliographer and Reference List* ,1888 *The Eightfold Way* Murray Gell-mann,2018-03-05 This monograph presents thirty research papers dealing with the classification of strongly interacting particles and their interaction according to the eightfold way In each chapter the authors commentary introduces the reprints The School Bulletin and New York State Educational Journal ,1905
