Reading Test 1

Read the following paragraph and then answer the questions below:

The United States covers a large part of the North America continent. Its neighbours are Canada to the north and Mexico to the south. Although the United States is a big country, it is not the largest in the world. In 1964, its population was over 185,000,000.

When this land first became a nation, after winning its independence from England, it had thirteen states. Each of the states was represented on the American flag by a star. All these states were in the eastern part of the continent. As the nation grew towards the west, new states were added to the flag. For a long time, there were 48 states. In 1959, however, two more states were added to the flag, representing the new states of Alaska and Hawaii.

Indians were the first inhabitants of the land, which is now the United States. There are still many thousands of the descendants of these original inhabitants living in all parts of the country. Sometimes it is said that the Indians are "the only real Americans". Most Americans, however, are descendants of people who came from all over the world to find a new life in a new land. Those who came first and in greatest numbers to make their homes on the eastern coast of North America were mostly from England. It is for that reason that the language of the United States is English and that its culture and customs are more like those of England than any other country in the world.

1. What countries are neighbours of the USA?

2. How many states were there at the beginning? How many are there now?

3. How are the states represented on the American flag?

4. Who were the first inhabitants of America?

5. Why are the customs and culture of the United States more like those of England than of any other country?
