Essays in Post-Critical Philosophy of Technology Mihály Héder, Eszter Nádas, 2019-02-15 Technology in all its forms has had and continues to have an indisputable impact on society and culture Philosophy of technology seeks to understand this impact and the meaning of technology for society and culture Although its origins can be traced back to the Greeks it wasn't until the late 19th century to the beginning of the 20th century that it gained ground as a philosophical discipline Now more than ever it is considered an essential philosophical enterprise The Budapest Workshop on Philosophy of Technology was a lively and successful event that sought to discuss

reflect on and apply this branch of philosophical inquiry to both historical and contemporary examples. Importantly, the contributors' methodological approaches were influenced by, although not limited to, Michael Polanyi's term post-critical. Moving beyond the rigidity of past approaches, the selected essays were driven by two lines of inquiry: what has been the historical role of technology in social and scientific change? And how can a post-critical approach enhance and extend our understanding of philosophy of technology? This edited volume begins by exploring the role of technology in social and scientific developments from a historical perspective, before moving towards a discussion of philosophy of technology from a Post-Critical epistemic stance. Free from the constraints of previous methodologies, the third part of this work engages with the term Post-Critical in its broadest sense. The contributors to this section consider the phenomenology of the body and the influence of technology on our lives. Finally, the four concluding chapters of this book apply this philosophical approach to a wide range of contemporary problems, from Decision Support Systems to Crisis Communication.

Negative Hermeneutics and the Question of Practice Nicholas Davey, 2023-12-28. How do words and images function hermeneutically? How does hermeneutic practice work? Answering these questions and more, Nicholas Davey develops the hermeneutical foundations of creative practice. In doing so, he not only uncovers the significance of philosophical hermeneutics for the arts and the humanities but defends the humanities as a whole from the current scepticism inspired by deconstruction and post-structuralism. Taking Gadamer's language ontology as its cue, this pioneering volume not only addresses certain weaknesses that Davey observes in Gadamer's thought but further takes Gadamerian thinking beyond Gadamer himself. In particular, Davey investigates the productive value of negativity that is central to hermeneutics and to wider spheres of creative learning. Advocating a renewed confidence in hermeneutics and the humanities, *Negative Hermeneutics and the Question of Practice* reveals how hermeneutical thinking provides a map of the dynamics within creative practice, eliminating the need for an externally imposed theory of the arts.

**Preparation for the Praxis I/PPST Exam**, 2005. *An Empty Curriculum* Sandra Stotsky, 2015-02-19. Teachers cannot teach what they do not know. This country has tolerated a weak licensing system for prospective teachers for decades. This weak system has been accompanied by an increasingly emptier curriculum for most students, depriving them of the knowledge and skills needed for self-government. *An Empty Curriculum: How Teacher Licensure Tests Lead to Empty Student Minds* makes the case that the complete revision of the licensing system for prospective and veteran teachers in Massachusetts in 2000 and the construction of new or more demanding teacher licensing tests contributed significantly to the Massachusetts education miracle. That miracle consisted of enduring gains in achievement for students in all demographic groups and in all regional vocational technical high schools since 2005, gains confirmed by tests independent of Massachusetts policy makers. The immediate purpose of this book is to explain what Massachusetts did in 2000 to strengthen its teacher licensing and re-licensing system to ensure that all teachers could teach to relatively strong K-12 standards. Its larger purpose is to suggest that development of strong academic standards in all

major subjects should be followed by complete revision of a state's teacher licensing system not as has been the case for several decades the development of K-12 student tests if this country wants to strengthen public education      **Constructed Responses for Learning** Warren Combs, 2016-02-05 Teaching students to write constructed responses does not have to become a test prep chore.
