Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary middle-aged men. The subjects were 15 men, 40 to 50 years old, who had been sedentary for at least 1 year. They were randomly assigned to a 12-week training program or a control group. The training program consisted of 3 sessions per week of aerobic exercise at 60% to 70% of the maximum HR. The control group did not exercise. The HR and HRR were measured at rest and during a maximal exercise test at baseline and after 12 weeks. The results showed that the training program significantly increased the HR and HRR at rest and during the maximal exercise test. The control group showed no significant changes. The results suggest that a 12-week training program can improve the cardiovascular fitness of sedentary middle-aged men.

- Day and night periods that are longer than the standard 24 hours occur most commonly with the use of artificial light or other light sources. To avoid this, there are two things the producer should do:
 - 1. Use natural light sources, if possible, and
 - 2. If artificial light is required, use the light source that is closest to the natural light source.
- The end of the day is the time when the light source is closest to the natural light source. The end of the day is the time when the light source is closest to the natural light source. The end of the day is the time when the light source is closest to the natural light source.

When you install your T-Value One Connection, improper installation of all four screws (52 connections for One Connection®) will affect the overall health, safety and life of the system. Proper ventilation is critical to maintain proper ventilation. Failure to maintain proper ventilation may result in a variety of problems with the product.

- When a producer's price for the output rises or falls, it must adjust its output level accordingly. For example, if the price of the output rises, the producer will increase its output level until the marginal revenue is equal to the marginal cost.
