Shadow Education and Social Inequalities in Japan Steve R. Entrich, 2017-12-07 This book examines why Japan has one of the highest enrolment rates in cram schools and private tutoring worldwide It sheds light on the causes of this high dependence on shadow education and its implications for social inequalities The book provides a deep and extensive understanding of the role of this kind of education in Japan It shows new ways to theoretically and empirically address this issue and offers a comprehensive perspective on the impact of shadow education on social inequality formation that is based on reliable and convincing empirical analyses Contrary to earlier studies the book shows that shadow education does not inevitably result in increasing or persisting inequalities but also inherits the potential to let students overcome their status specific disadvantages and contributes to more opportunities in education Against the background of the continuous expansion and the convergence of shadow education systems across the globe the findings of this book call for similar works in other national contexts particularly Western societies without traditional large scale shadow education markets The book emphasizes the importance and urgency to deal with the modern excesses of educational expansion and education as an institution in which the shadow education industry has made itself seemingly indispensable

single phase electric power wikipedia - May 14 2023

web in electrical engineering single phase electric power abbreviated 1 ϕ is the distribution of alternating current electric power using a system in which all the voltages of the supply vary in unison single phase distribution is used when loads are mostly lighting and heating with few large electric motors

what is a single phase motor one stop industrial automation - Apr 13 2023

web single phase motors generally refer to low power single phase asynchronous motors powered by a single phase ac power supply it is also called a single phase induction motor this kind of motor usually has two phase windings on the stator and the rotor is of ordinary squirrel cage type

13 9 single phase induction motors workforce libretexts - Feb 11 2023

web the single coil of a single phase induction motor does not produce a rotating magnetic field but a pulsating field reaching maximum intensity at 0 o and 180 o electrical figure below single phase stator produces a nonrotating pulsating magnetic field another view is that the single coil excited by a single phase current produces two

what is single phase motor a detailed overview xinnuo - Apr 01 2022

web sep 16 2022 parts of single phase motor rotor the rotor is a single phase motor comprises of the squirrel cage structure which rotates around the stator the stator of single phase motor consists of two winding main and auxiliary winding the current flow through fan due to high thermal and

single phase vs three phase power explanation fluke - Sep 06 2022

web single phase power is a two wire alternating current ac power circuit typically there is one power wire the phase wire and one neutral wire with current flowing between the power wire through the load and the neutral wire three phase power is a three wire ac power circuit with each phase ac signal 120 electrical degrees apart

induction motor wikipedia - Mar 12 2023

web there are three basic types of small induction motors split phase single phase shaded pole single phase and polyphase in two pole single phase motors the torque goes to zero at 100 slip zero speed so these require alterations to the stator such as shaded poles to provide starting torque

single phase induction motor electrical technology all about - Sep 18 2023

web types of single phase induction motors split phase induction motor shaded pole induction motor capacitor start induction motor capacitor start capacitor run induction motor permanent capacitor induction motor

single phase induction motors circuit cellar - Jul 04 2022

web dec 15 2021 figure 1 a single phase induction motor stator produces a pulsating magnetic field rather than a rotating one as in a three phase motor this means there is no torque when the rotor is stationary once it is moving the currents induced in the rotor create a magnetic field that interacts with the pulsating field to produce a torque and thus
