Pyropolitics When The World Is Ablaze:

Pyropolitics Michael Marder, 2014-12-12 A highly original theory of the political the book explores the literal and metaphorical flare ups in political theology revolutionary thought radical protests and global energy production

Pyropolitics in the World Ablaze Michael Marder, 2020-11-09 From books and heretics burnt on the pyres of the Inquisition to self immolations at protest rallies from the burning of fossil fuels to inflammatory speech from the imagery of revolutionary sparks ready to ignite the spirits of the oppressed to car bombings and scorched earth policy fire proves to be an indispensable element of the political Pyropolitics in the World Ablaze builds upon the scintillating by turns horrifying and hopeful images and realities of flames hearths sparks immolations melting pots incinerations and burning in political thought and practices Relying on classical political theory theology philosophy literature and cinema as well as an analysis of current events Michael Marder argues that geo politics or the politics of the Earth has always had an unstable at once shadowy and blinding underside pyro politics or the politics of fire If this obscure double of geopolitics is increasingly dictating the rules of the game today then it is crucial to learn to speak its language to discern its manifestations and to project where our world ablaze is heading This new edition includes recent examples of the uses and accusations of incendiary speech both by Donald Trump and by European populist right and exploration of threats of global warming that have now reached a turning point in our collective relation to the dangers and promises of fire *Building a New World* Luce Irigaray, Michael

Marder, 2015-06-08 With an original introduction by Luce Irigaray and original texts from her students and collaborators this book imagines the outlines of a more just ecologically attuned world that flourishes on the basis of sexuate difference *The End of the World* Marcia Sa Cavalcante Schuback, Susanna Lindberg, 2017-03-29 The end of the world opens up philosophical questions concerning the very notion of the world which is a fundamental element of all existential phenomenological and hermeneutical philosophy Is the end of the world for us somebody's death the end of being in the world or the extinction of many or of all the end of the world itself Is the erosion of the world a phenomenon that does not in fact affect the notion of the world as a fundamental feature of all existential ontological inquiry This volume examines the present state of these concerns in philosophy film and literature It presents a philosophical hermeneutics of the present state of the world and explores the principal questions of the philosophical accounts of the end of the world such as finality and finitude It also shows how literature and cinema have ventured to express the end of the world while asking if a consequent expression of the end of the world is also an end of its expression Burning Matters Peter C. Little, 2022 Global trade in electronic waste

e waste has led to various waste management challenges and many regions of the Global South have suffered the toxic consequences In *Burning Matters* Peter C Little explores the complex cultural economic and environmental health politics of e waste work in Ghana He brings to light the lived experiences of Ghana's e waste workers as they navigate the health social and economic challenges of highly toxic e waste labor In particular Little engages the experiences of e waste workers who

burn bundles of electrical cables to extract copper a practice that contaminates bodies and the urban environment and which has attracted international organizations seeking to mitigate risk and find quick tech solutions to this highly toxic e waste work A nuanced perspective on e waste burning and environmental politics in Africa at a time when global e waste generation and trade is at an all time high Burning Matters contends that e waste interventions devoid of ethnographic perspective and knowledge risk downplaying the vibrant complexities of e waste itself and the matters of social life and labor that matter most to Ghana's e waste workers

Carl Schmitt Between Technological Rationality and Theology Hugo Herrera, 2020-06-01 Carl Schmitt one of the most influential legal and political thinkers of the twentieth century is known chiefly for his work on international law sovereignty and his doctrine of political exception This book argues that greater prominence should be given to his early work in legal studies Schmitt himself repeatedly identified as a jurist and Hugo E Herrera demonstrates how for Schmitt law plays a key role as an intermediary between ideal conceptual theory and the complexity of practical concrete situations Law is concerned precisely with balancing the extremes of theory and reality and in this respect Schmitt associates it with philosophical thinking broadly as being able to understand and explain the tensions in human experience Reviewing and analyzing prevailing interpretations of Schmitt by Jacques Derrida Heinrich Meier and others Herrera argues that the importance of Schmitt's legal framework is both significant and overlooked

Eco-Deconstruction Philippe Lynes, David Wood, 2018-03-27 Eco Deconstruction marks a new approach to the degradation of the natural environment including habitat loss species extinction and climate change While the work of French philosopher Jacques Derrida 1930 2004 with its relentless interrogation of the anthropocentric metaphysics of presence has already proven highly influential in posthumanism and animal studies the present volume drawing on published and unpublished work by Derrida and others builds on these insights to address the most pressing environmental issues of our time The volume brings together fifteen prominent scholars from a wide variety of related fields including eco phenomenology eco hermeneutics new materialism posthumanism animal studies vegetal philosophy science and technology studies environmental humanities eco criticism earth art and aesthetics and analytic environmental ethics Overall eco deconstruction offers an account of differential relationality explored in a non totalizable ecological context that addresses our times in both an ontological and a normative register The book is divided into four sections Diagnosing the Present suggests that our times are marked by a facile flattened out understanding of time and thus in need of deconstructive dispositions Ecologies mobilizes the spectral ontology of deconstruction to argue for an originary environmentality the constitutive ecological embeddedness of mortal life Nuclear and Other Biodegradabilities examines remains including such by products and disintegrations of human culture as nuclear waste environmental destruction and species extinctions Environmental Ethics seeks to uncover a demand for justice including human responsibility for suffering beings that emerges precisely as a response to original differentiation and the mortality and unmasterable alterity it installs in living beings As

such the book will resonate with readers not only of philosophy but across the humanities and the social and natural sciences

Political Categories Michael Marder, 2019-03-12 Western philosophy has been dominated by the concept or the idea the belief that there is one sovereign notion or singular principle that can make reality explicable and bring all that exists under its sway In modern politics this role is played by ideology Left right or center political schools of thought share a metaphysics of simplification We internalize a dominant largely unnoticeable framework oblivious to complex plural and occasionally conflicting or mutually contradictory explanations for what is the case In this groundbreaking work Michael Marder proposes a new methodology for political science and philosophy one which he terms categorial thinking In contrast to the concept no category alone can exhaust the meaning of anything categories are so many folds complications respectful of multiplicity Ranging from classical Aristotelian and Kantian philosophies to phenomenology and contemporary politics Marder's book offers readers a theoretical toolbox for the interpretation of political phenomena processes institutions and ideas His categorial apparatus encompasses political temporality and spatiality the revolutionary and conservative modalities of political actuality possibility and necessity quantitative and qualitative approaches to the study of political reality the meaning of political relations and various senses of political being Under this lens the political appears not as a singular concept but as a family of categories allowing room for new plural and often antagonistic ideas about the state the people sovereignty and power

The Future of Meat Without Animals Brianne Donaldson, Christopher Carter, 2016-08-16 Plant based and cell cultured meat milk and egg producers aim to replace industrial food production with animal free fare that tastes better costs less and requires a fraction of the energy inputs These products are no longer relegated to niche markets for ethical vegetarians but are heavily funded by private investors betting on meat without animals as mass market environmentally feasible alternatives that can be scaled for a growing global population This volume examines conceptual and cultural opportunities entanglements and pitfalls in moving global meat egg and dairy consumption toward these animal free options Beyond surface tensions of meatless meat and animal free flesh deeper conflicts proliferate around naturalized accounts of human identity and meat consumption as well as the linkage of protein with colonial power and gender oppression What visions and technologies can disrupt modern agriculture What economic and marketing channels are required to scale these products What beings and ecosystems remain implicated in a livestock free food system A future of meat without animals invites adjustments on the plate but it also inspires renewed habits of mind as well as life affirming innovations capable of nourishing the contours of our future selves This book illuminates material and philosophical complexities that will shape the character of our future's of food

Heidegger and the Global Age Antonio Cerella, Louiza Odysseos, 2017-10-18 Globalization is one of the most contested and abused concepts of our time Whether one interprets it as a collective illusion or as the final stage of capitalism as uncontrollable multitude or as a radical opening of new spaces of freedom the global age represents the conceptual and existential background of our being in the world But what lies behind

this process What mode of human existence is brought about by the age of technology and global mobilization And is it possible to attempt a unitary interpretation of this age that presents itself as both total and pluralistic This volume rethinks these epochal questions in light of Martin Heidegger s complex hermeneutics proposing at the same time that such questions enable the interrogation of some of its most fundamental aspects the metanarrative of Seinsgeschichte as withdrawal of Being the structure of human existence within the frame of technology the relation between humanism and nihilism as well as politics and technology the changing character of subjectivity in the age of the world picture the mythopoeic force of art and the uprooting of human beings As this volume shows interrogating Heidegger s thought has significant potential for both International Political Theory and also the analysis of specific concepts and dynamics in contemporary international studies such as the changing character of spatiality temporality and subjectivity
