Perspective, Projections and Design Mario Carpo, Frédérique Lemerle, 2013-04-15 The essays selected for this book presented in chronological order discuss various aspects of image making technologies geometrical knowledge and tools for architectural design focusing in particular on two historical periods marked by comparable patterns of technological and cultural change The first is the Renaissance characterized by the rediscovery of linear perspectives and the simultaneous rise of new formats for architectural drawing and design on paper the second the contemporary rise of digital technologies and

the simultaneous rise of virtual reality and computer based design and manufacturing Many of the contributing authors explore the parallel between the invention of the perspectival paradigm in early modern Europe and the recent development of digitized virtual reality This issue in turn bears on the specific purposes of architectural design where various representational tools and devices are used to visualize bi dimensional aspects of objects that must be measured and eventually built in three dimensional space

On Pyrrho and Time Jean-Paul Martinon, 2024-09-28 Today's understanding of time remains mostly Aristotelian and Newtonian Einsteinian time is what has been abstracted from the mundane realities of life and reduced to its measurement Any somatic psychological or other experience of time is deemed either irrelevant or secondary The history of the attempts to provide alternatives to time as measurement is infinite most of which focuses on understanding time as an inner temporal phenomenon for which a subject temporalizes him or herself through remembrance experience or anticipation including death Amidst this vast field one argument by an enigmatic figure in ancient Greek thought stands out for the way it abides by neither the conventional view that time is clock time nor that it is an inner temporal phenomenon Aenesidemus overlooked way of apprehending time by qualifying it as similar to air To make sense of such an unusual statement it is necessary to reconsider what informs such an unusual idea Aenesidemus teacher was Pyrrho often dubbed the Greek Buddha who advocated for a non differential approach to reality one for which nothing is fixed or stable With this perspective in mind Aenesidemus idea then becomes clear time or air knows no differentiae whether that of the unit of measure or of the subject breathing it and sheltering from it Both are radically unstable While these ideas had no purchase for over 2000 years they can now be revealed in all their magnitude In the last 120 years we have indeed become aerial beings We no longer scuttle around on the ground floor below an unsuspected ocean of air We no longer aspire to shin a tree or scale a peak We have now made a habitation of the air Such a new dwelling has its own unique time a time that strangely does not agree with the abstracted and or calculated time that was formulated when we only had sundials and water clocks at our disposal Against time as measure and against time as inner temporal phenomenon comes time as total instability Can revisiting the few fragments that Pyrrho and his disciple left us help once again articulate our relation to time and give us a renewed sense of reality and who we are within it This monograph focuses on early Pyrrhonism as distinguished from the sceptical work of Sextus Empiricus Pali Buddhism as well as contemporary interpretations of time and reality in both science and philosophy

Memory Assemblages Hilan Bensusan, 2024-10-03 Making the claim that reality is more like memory than a permanent substance this original work draws on Derrida and Malabou to suggest a picture of the world as an assemblage of spectral resonances and disseminations In *Memory Assemblages* Hilan Bensusan combines elements of continental and analytic philosophy to advance a theory of realism which insists on the reality of spectres an ultrametaphysical approach departing from metaphysics while attending to the problems that triggered metaphysical investigation In doing so Bensusan builds on the reception of Derrida's hauntology particularly by Latin American scholars in

disciplines such as media studies history and political theory and engages with currents of speculative realism as well as contemporary work on idealism and logic Challenging the correlationist view in which being and time cannot be considered independently of subjectivity Bensusan gives an account of exteriority where thought and reality share a common logic of addition Central to the book is this philosophy of addition where addition structures the insufficiency and incompleteness of whatever seems to be present it is an operation that dismantles what has been before in a way that depends on that past consigned to memory Addition is explored in light of the Derridian supplement the Epicurean Swerve Jean Luc Nancy s notion of struction and the Marxist notion of forces of production A coda further elaborates the notion of production in this context arguing for a spectral Marxism and drawing on Deleuze and Guattari s *Anti Oedipus* *Pyrrho of Elis: Oxford Bibliographies Online Research Guide* Dee Clayman,2010-05 This ebook is a selective guide designed to help scholars and students of the ancient world find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books chapters and journal articles to online archives electronic data sets and blogs Written by a leading international authority on the subject the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated A reader will discover for instance the most reliable introductions and overviews to the topic and the most important publications on various areas of scholarly interest within this topic In classics as in other disciplines researchers at all levels are drowning in potentially useful scholarly information and this guide has been created as a tool for cutting through that material to find the exact source you need This ebook is just one of many articles from Oxford Bibliographies Online Classics a continuously updated and growing online resource designed to provide authoritative guidance through the scholarship and other materials relevant to the study of classics Oxford Bibliographies Online covers most subject disciplines within the social science and humanities for more information visit [www aboutobo com](http://www.aboutobo.com) **Études rabelaisiennes** Anonyme,1998 **The Return of Scepticism** Gianni Paganini,2013-03-14 This collection of articles the Vercelli conference proceedings places the theme of scepticism within its philosophical tradition It explores the English philosophical thinkers the French context as well as major Italian figures and Spanish culture It pays special attention to the relationships between history of philosophical ideas and the problems rising from the history of sciences medicine physics linguistics historical scholarship in the 17th and the18th centuries
