Differentiated Instruction for the Middle School Math Teacher Karen E. D'Amico, Kate Gallaway, 2008-01-02

Differentiated Instruction for the Middle School Math Teacher is a practical and easy to use resource for teaching a standards based math curriculum to all learners. It gives you effective ways to present math concepts, shows how to provide opportunities for guided practice and offers ideas for modifying the material to provide access to the same content standard for all students in the inclusive classroom. This book also contains key strategies for collaborating with other professionals, suggestions for involving the students' families by tying math concepts to students' everyday lives and valuable assessment strategies. The lessons in the book cover middle school math topics correlated to the standards of the National Council of Teachers of Math, ranging from numbers and operations to problem solving and reasoning. Each lesson includes instructions for presenting the lesson to the whole class, worksheets designed to help review and reinforce the concepts presented in each lesson, a section on how to adapt the lesson for the inclusive classroom including descriptions of different stations for different learners, a home school connection with family based everyday math activities, suggestions for how to assess students' grasp of the concepts presented in the lesson. *Resources in Education*, 1995. **The Math Teacher's**

Problem-a-Day, Grades 4-8 Judith A. Muschla, Gary R. Muschla, 2008-04-11. From bestselling authors Judith and Gary Muschla, *The Math Teacher's Problem a Day* is a hands on resource containing 180 handy worksheets, one for each day of the school year, to help students in grades 4-8 acquire the skills needed to master mathematics. These reproducible worksheets are perfect for sponge activities, five minute challenges to start or end a class period, that can also be used as supplemental lessons, homework or extra credit. With problems based on the Standards and Focal Points of the National Council of Teachers of Mathematics, the book is designed to give students valuable practice in math skills using specific activities to enhance critical thinking and boost test scores. The topics covered focus on the core math concepts and skills required for middle school students, including Numbers and Operations, Algebra, Geometry, Measurement, Data Analysis. Part of the 5 Minute Fundamentals series, *The Math Teacher's Problem a Day* is an important resource that will help today's students understand more concepts, make connections between branches of mathematics and apply math skills to a variety of real life problems. *Resources in Education*, 1995. *Curricular Program Implementation in the Context of Randomized Field Trials* Gloria Isabel Miller, 2011. Abstract: curricular program implementation in the context of randomized field trials. Gloria Isabel Miller. This study examined three cases of commercially available curricular program implementations to determine if a unified approach to measuring the level of implementation was possible. Further, the study investigated whether the level of curriculum and implementation plan specificity made a difference to the strength of implementation achieved in classrooms and described the implementation evolution in different contexts. The study sample consists of a total of 163 teachers in eight school districts across the United States. In each case, teachers were randomly assigned to using the

curricular innovation or their currently used materials and processes The three cases HS Math NewScience and MathIntervention were purposely chosen to represent three different points of curricular and implementation specificity and two different subject areas math and science Each case features a commercially available program that also had opportunities for teachers to use electronic technology to enhance their learning or to engage their students The cases represent differing student grade levels The cases are different enough to provide a range that exercises the measurement techniques introduced in this study so results can begin to generalize across curricular programs and grades However the cases are similar enough in research design instrumentation and data collection methods to make them comparable A key contribution of this investigation is the creation of a framework to measure the level of implementation the extent to which the teacher and students display the actions behaviors and interactions expected by using the innovation The unified conceptual framework arrived at by using an Activity Theory perspective together with the analytical methods employed provide a way to view the rich complex interaction of implementation as a system with the larger system of the school organization Data from the analysis revealed that variations in the level of implementation were no different regardless of the level of specificity A strong finding of this work is that implementation evolves slowly even when the curricular program is scripted and coaching support is provided to teachers The paper concludes with implications for policy and future research
