Python Cookbook Alex Martelli, David Ascher, 2002 The Python Cookbook is a collection of problems, solutions, and practical examples for Python programmers written by Python programmers. Over the past year, members of the Python community have contributed material to an online repository of Python recipes hosted by ActiveState. This book contains the best of those recipes accompanied by overviews and background material by key Python figures. The recipes in the Python Cookbook range from simple tasks such as working with dictionaries and list comprehensions to entire modules that demonstrate templating systems and network monitoring. This book contains over 200 recipes on the following topics: Searching and sorting, Manipulating text, Working with files and the filesystem, Object-oriented programming, Dealing with threads and processes, System administration, Interacting with databases, Creating user interfaces, Network and web programming, Processing XML, Distributed programming, Debugging and testing, Extending Python. This book is a treasure trove of useful code for all Python programmers, from novices to advanced practitioners, with contributions from such Python luminaries as Guido Van Rossum, David Ascher, Tim Peters, Paul Prescod, Mark Hammond, and Alex Martelli, as well as over 100 other Python programmers. The recipes highlight Python best practices and can be used directly in day-to-day programming tasks as a source of ideas or as a way to learn more about Python. The recipes in the Python Cookbook were edited by David Ascher, who is on the board of the Python Software Foundation and is the co-author of *Learning Python*, and Alex Martelli, who is known for his numerous and exhaustive postings on the Python mailing list. The book contains a foreword by Guido van Rossum, the creator of Python.

Python Programming on Win32 Mark J. Hammond, Andy Robinson, 2000 This is the first book to demonstrate how to use Python as a serious Windows development and administration tool. It addresses all the basic technologies for common integration tasks on Windows, explaining both the Windows issues and the Python code needed to glue things together.
