

SARASOTA MEMORIAL HOSPITAL

DEPARTMENT POLICY

TITLE: PYXIS MEDSTATION
SYSTEM – OVERRIDE OF
MEDICATIONS

POLICY #: 129.113 (Pharmacy)
126.212 (Patient Care)

EFFECTIVE DATE: 2/06

REVISED DATE: 6/12

POLICY TYPE: ☐ DEPARTMENTAL
☒ INTERDEPARTMENTAL
☐ DEPARTMENTS PROVIDING NURSING CARE

PAGE: 1 of 4

**Job Title of Responsible
Owner:** Manager, Pharmacy

PURPOSE: This policy identifies best practices designed to provide for a safe medication management system associated with the use of the Pyxis MedStation override function.

**POLICY
STATEMENT:** Best pharmaceutical practices and Joint Commission Medication Management Standard 05.01.01, require all medication orders to be reviewed for appropriateness by a pharmacist unless a licensed practitioner controls the ordering, preparation, and administration of the medications; or in urgent situations when the resulting delay would harm the patient, including situations in which the patient experiences a sudden change in clinical status. The Pyxis override function should not be used to access first dose medications prior to pharmacist review in routine situations.

EXCEPTIONS: None.

DEFINITIONS: Critical Override (Profile Override): Pyxis System status during which any given medication stocked in a Pyxis MedStation may be removed by utilizing the override function.

Override. Override is the process by which the user removes a medication from a MedStation for a patient that is not part of the patient's profile. This is done by selecting the **OVERRIDE** button at the MedStation and assumes that Critical Override (Profile Override) is ON at the MedStation or that the user is in an Override Group, which has privileges to Override the medication. Whenever a patient's profile is overridden, this information appears on the transaction slip and on various reports.

Override Medications: Medications that can be accessed without pharmacist review of the order for the medication.
