Working with the Aging Population Cheryl Kruschke, 2018-02-26 This textbook fills a gap in education for licensed practical nurses LPN providing information specific to their own needs and concerns Firstly it clarifies the leadership role of LPNs in the healthcare setting and then identifies the knowledge skills and abilities related to leadership management communication culture change and person directed care concepts It also explains the efficacy of these concepts related to the LPN care of patients in the work setting and reviews the Nurse Practice Act NPA enacted in every US state LPNs play an essential role in the patient care team and we have to ensure they receive advanced education as practitioners in healthcare settings that reach vulnerable populations such the elderly They have been considered as the registered nurses right hand in acute care as well as many home health settings They provide basic medical and nursing care ensure the comfort of patients discuss health care with patients and report the status of patients to registered nurses and doctors But the LPNs are often

expected to take on a real leadership role based on the perception that as licensed nurses they already have all the qualifications and education necessary for leadership roles. However, there is a gap in the education they receive and a limited body of literature dedicated to them. Written in honor of all LPNs, this educational textbook fills that gap. With learning objectives, review questions, and scenarios, it is a valuable resource for courses for undergraduate students training to be LPNs.

Post-Acute and Long-Term Care Medicine Peter Winn, Pamela A. Fenstermacher, Richard G. Stefanacci, R. Scott DeLong, 2023-07-12

This book addresses current issues surrounding hospital admissions and readmissions and the practice of post-acute and long-term care (LTC). Now in its fully revised and expanded third edition, it contains the most up-to-date knowledge and regulations pertinent to practice in Post-Acute and Long-Term Care Medicine. Post-Acute and Long-Term Medicine is divided into four main sections. The first section is an introduction to long-term care. It includes chapters on home health care, assisted living, and residential care, department of veteran affairs, and nursing facilities, among others. The second section focuses on clinical medicine in post-acute and long-term care and contains chapters on common clinical conditions, preventing hospital admissions and readmissions, palliative care, weight and nutrition, and wound care. The third section details psychosocial aspects of post-acute and long-term care. Chapters in this section describe dementia, delirium, depression, ethical and legal issues, and caring for families. The fourth and final section centers on special issues in post-acute and long-term care. This section focuses on documentation and coding, medication management, and rehabilitation and maximizing function. The outbreak of COVID-19 has led to two very important new chapters in this section. One chapter discusses challenges and opportunities in post-acute long-term care that have arisen during the pandemic. Another new chapter talks about the importance of virtual care and telemedicine in post-acute and long-term care amidst the COVID-19 outbreak. Written by experts in the field, many of whom have worked within AMDA, The Society for Post-Acute and Long-Term Care Medicine, to create and disseminate a knowledge base for post-acute and LTC, this is a valuable resource for clinicians and educators seeking to maximize the care and living experience of residents in post-acute and long-term care settings.
