What is QLab 3?

A brief introduction to QLab 3 and its features

QLab 3 is a software that lets you create cue-based sequences of events for live shows. You can use it to play back audio, video, images, text, MIDI, OSC, and more. You can also control external devices such as projectors, cameras, lights, sound systems, etc. using QLab's built-in features or third-party plugins.

QLab 3 has a simple and intuitive interface that makes it easy to create and edit cues. You can drag and drop files from your Mac or the web into your cue list, adjust their settings using the inspector panel, and trigger them manually or automatically using various triggers. You can also group cues together, loop them, fade them in or out, apply effects, and much more.

QLab 3 also has a powerful feature called Surfaces, which allows you to map your video output to multiple screens or projectors. You can create custom shapes and masks for your video cues, adjust their position, rotation, scale, opacity, etc. You can also use Syphon or NDI to send or receive video from other applications.
