New Labour and the New World Order Steven Kettell, 2013-07-19 The war on terror has shaped and defined the first decade of the twenty first century yet analyses of Britain s involvement remain limited and fragmentary This book provides a comprehensive analysis of these developments It argues that New Labour s support for a militaristic campaign was driven by a desire to elevate Britain s influence on the world stage and to assist the United States in a new imperialist project of global reordering Ostensibly set within a political framework of promoting humanitarian values the government s conduct in the war on terror also proved to be largely counter productive eroding trust between the citizenry and the state putting the armed forces under increasing strain and ultimately exacerbating the threat from radical Islamic terrorism This book will be of interest to teachers and scholars of British foreign policy international relations and security studies It will also appeal to anyone interested in Britain s role in the war on terror *Report by the Auditor General for the Period ...* Swaziland, 2012

Cuban Health Care Steven Ullmann, Mary Helen Spooner, 2014-08-20 The Cuban health care system has been the focus of much international attention and debate while revealing jarring contrasts Long publicized as the Cuban Revolution's greatest accomplishment it is also a system covered by such a thick wall of political ideology that critical analysis is difficult Its medical missions in Haiti and other developing countries have generated good will toward the Castro government even as humanitarian groups in North America and Europe organize shipments of medicines and medical equipment to Cuban clinics and hospitals plagued by shortages of the most basic supplies No country's health care system functions independently of its economy and over the years Cuba's medical services and public health indicators have improved at some intervals and declined at others Cuban authorities have been closing medical facilities and making other cutbacks in the health budget amid reported outbreaks of cholera and dengue fever in several parts of the country The Cuban health care system is facing more upheaval as the country begins to look ahead to a post Castro Cuba and the changes this could entail

Hidden in Plain Sight Peter J. Wallison, 2016-03-29 The 2008 financial crisis like the Great Depression was a world historical event What caused it will be debated for years if not generations The conventional narrative is that the financial crisis was caused by Wall Street greed and insufficient regulation of the financial system That narrative produced the Dodd Frank Act the most comprehensive financial system regulation since the New Deal There is evidence however that the Dodd Frank Act has slowed the recovery from the recession If insufficient regulation caused the financial crisis then the Dodd Frank Act will never be modified or repealed proponents will argue that doing so will cause another crisis A competing narrative about what caused the financial crisis has received little attention This view which is accepted by almost all Republicans in Congress and most conservatives contends that the crisis was caused by government housing policies This book extensively documents this view For example it shows that in June 2008 before the crisis 58 percent of all US mortgages were subprime or other low quality mortgages Of these 76 percent were on the books of government agencies such as Fannie Mae and Freddie Mac When these mortgages defaulted in 2007 and 2008 they drove down housing prices and weakened banks and other mortgage holders causing the crisis After this book is published no one will be able to claim that the financial crisis was caused by insufficient regulation or defend Dodd Frank without coming to terms with the data this book contains
