

Part 1 - Bridging the gap

- Pictured above are the two existing equations for the uphill portions of the roller coaster, $f(x)$ and $g(x)$. The materials for these portions has already been ordered, so you cannot adjust them. Instead, the owners of the park are asking for the equation of a downhill portion that will bridge the gap between them. Using the information above, write an equation with a minimum point of $(27, 0)$ that intersects $f(x)$ at $(25, -4)$ and intersects $g(x)$ at $(25, -4)$.
- Write this equation in both vertex and standard form.
