

Qualitative Data Collection - Types of Interview Guides

Structured interviews

What: Questions and their sequence are predetermined. A standardized approach to data collection ensures uniformity across all interviews and reduces the potential for interviewer bias.

When: Ideal when a meticulous and controlled interview process is desired.

Semi-Structured interviews

What: Predetermined questions, but maintains flexibility to ask follow-up questions and explore topics in more depth. It fosters a conversational atmosphere and allows flexibility to adjust based on participant responses.

When: Suited for delving into topics while maintaining a certain level of standardization.

Unstructured interviews

What: No predetermined set of questions, a free-flowing conversational method. Difficult to compare responses across different interviewees due to the lack of standardization.

When: Preferred when seeking unrestrained participant expression on a topic.
