[Online Film Production in China Using Blockchain and Smart Contracts](#) Patrice Poujol, 2019-03-04. This book explores the use of Blockchain and smart contract technologies to develop new ways to finance independent films and digital media worldwide. Using case studies of Alibaba and in depth on set observation of a Sino US coproduction as well as research collected from urban China, Hong Kong, Europe and the USA. *Online Film Production in China Using Blockchain and Smart Contracts* explores new digital platforms and what this means for the international production of creative works. This research assesses the change in media consciousness from young urban audiences, their emergence as a potential participative and creative community within dis-intermediated, decentralised and distributed crowdfunding and crowdsourcing models. This research proposes solutions on how these young emerging local creative talents can be identified and nurtured early on, particularly those who now produce creative and artistic audiovisual content, whether these works are related to film, Virtual Reality, VR, video game, graphic novels or music. Ultimately, a new media content finance and production platform implementing blockchain is proposed to bring transparency in the film sector and open doors to emerging artists in digital media.
