Quantitative Methods Software William E. Pinney, Randy McElroy, Mark Atchison, Joe Ormsby, Ned Nowotny, 2004-01-15
QMS is a comprehensive set of quantitative decision making tools for academic business and scientific use. It solves models for most aspects of quantitative methods modeling and decision analysis including linear programming, mixed integer linear programming, assignment and transportation models, various network and forecasting models, inventory and production models, and dynamic programming models. QMS also contains modules to solve production planning, decision theory, queuing systems, finite Markov chains, learning curves, and standard simulation models. In short, QMS is the perfect supplement for students and practitioners in the Operations Research and Management Science disciplines.

Dissertation Research Methods Philip Adu, D. Anthony Miles, 2023-09-11
Dissertation Research Methods: A Step by Step Guide to Writing Up Your Research in the Social Sciences focuses specifically on the methodology for planning, writing, and submitting your dissertation thesis. Written by two methodology experts in the social sciences, the book provides a step by step guide through each stage of the dissertation process. It covers all aspects of the methodological considerations needed from choosing a topic or research question, developing a literature review, identifying research gaps, accessing potential study participants, utilizing the right sampling strategies, analyzing data, and writing up findings. Readers are introduced to the main research methods normally used in dissertations and their characteristics, and they are guided to choose an appropriate research method for their study, provide a substantial description of the selected method, and articulate strong arguments in support of it. The book is filled with templates, exemplars, and tools to help students write about methodology in their thesis and to equip readers to successfully troubleshoot any methodology challenges they may face. This compact book will be of use to all graduate students and their supervisors in the Social Sciences and Education and Behavioural Sciences who are looking for a guide to working with robust and defensible methodological principles in their dissertation research and theses.
