Methodologies and Intelligent Systems for Technology Enhanced Learning, 9th International Conference,

Workshops Elvira Popescu, Ana Belén Gil, Loreto Lancia, Luigia Simona Sica, Anna Mavroudi, 2019-06-24 This book is based on the 9th International Conference in Methodologies and Intelligent Systems for Technology Enhanced Learning which was hosted by the University of Salamanca and held in Vila Real, Spain from 26th to 28th June 2019. Expanding on the topics of the evidence-based TEL workshops series, it provides an open forum for discussing intelligent technologies for learning. In particular, it discusses recommendation mechanisms that enable us to tailor learning to different contexts and people, e.g. by considering their personality and learning analytics that help augment learning opportunities, e.g. by supporting the adaptation of the learning material. In addition to technologies, it covers methods from different fields such as educational psychology or medicine and from diverse communities co-working with people such as making communities and participatory design communities to help create novel TEL opportunities. Further, it describes the use of methods and technologies to investigate and enhance learning for fragile users like children, the elderly, and those with special needs. We thank the sponsors IEEE Systems, Man, and Cybernetics Society Spain Section Chapter and the IEEE Spain Section Technical Co-Sponsor IBM India Viewnext Global exchange AEPIA APPIA and AIR institute.

Tone Orthography and Literacy David Roberts, Stephen L. Walter, 2021-07-15 This book presents the results of a series of literacy experiments in ten Niger-Congo languages representing four language families and spanning five countries. It asks the research question: To what extent does full tone marking contribute to oral reading fluency, comprehension, and writing accuracy, and does that contribution vary from language to language? One of the main findings is that the ethno-literacy profile of the language community and the social profile of the individual are stronger predictors of reading and writing performance than are the linguistic and orthographic profiles of the language. Our data also suggest that full tone marking may be more beneficial for less educated readers and those with less experience of L1 literacy. The book will bring practical help to linguists and literacy specialists in Africa and beyond who are helping to develop orthographies for tone languages. It will also be of interest to cognitive psychologists exploring the reading process and researchers investigating writing systems.

180 Days of Language for First Grade Christine Dugan, 2014-10-01 180 Days of Language is a fun and effective daily practice workbook designed to help students improve their grammar skills.
