The Heart of Sustainability Andres Edwards,2015-11-01 A thriving life and livable future for our planet starts with you Amidst the doom and gloom that dominates the headlines a different kind of story about an alternative and sustainable future is unfolding The players are social activists visionaries revolutionaries and cultural innovators the backdrop is this Anthropocene the tipping point of our global and environmental challenges and the narrative is the molding of a new paradigm to shape our collective future and make environmental change The Heart of Sustainability delves into the human dimension of this burgeoning international movement with an aim to become climate activists and build a better world Author Andr s Edwards frames the conversation

about consciousness activism innovation and sustainability by Explaining how self development is a key driver for environmental planetary change Describing how the confluence of the consciousness and technological revolutions provide unique opportunities for balance and fulfillment Exploring how we can move forward individually and collectively to create a thriving livable future from the inside out during this Anthropocene This landmark work illustrates the integration of the four Es ecology economy equity and education the bedrock of the current sustainability framework with the four Cs conscious creative compassionate and connected Focusing on specific examples and concrete initiatives from social activists around the world it shows us how to reconnect with ourselves each other and nature in order to tackle the climate change challenges we face as a global community Andr s R Edwards is the author of the award winning *Thriving Beyond Sustainability* and *The Sustainability Revolution* He is also the founder and president of EduTracks a firm specializing education programs and consulting services on sustainable practices for museums zoos aquariums culture and history centers *Drawing Coastlines* V. Chitra,2024-12-15 *Drawing Coastlines* reveals the ways that technical images such as weather infographics sea level projections and surveys are fast remaking Mumbai s coasts and coastal futures They set in place infrastructural interventions vocabularies of development and conservation and their lines and dots inscribe material conditions of existence and horizons of loss that entangle life forms V Chitra interlaces graphics and text by redrawing scientific images the moments of their construction the choices and consequences of what gets drawn and what does not and how images are seen performed and manifest These visual reconstructions show how images remake human nonhuman relationships arrange urban politics and materialize landscapes in complex and contradictory ways The multimodal format of *Drawing Coastlines* engages in the politics of its context where words and images combine to create coastal worlds and to find through a creative anthropology openings to build new forms of care in the midst of crisis *Beyond Capital* David Hakken,Maurizio Teli,Barbara Andrews,2015-10-23 The financial social cataclysm beginning in 2007 ended notions of a great moderation and the view that capitalism had overcome its systemic tendencies to crisis The subsequent failure of contemporary social formations to address the causes of the crisis gives renewed impetus to better analysis in aid of the search for a better future This book contributes to this search by reviving a broad discussion of what we humans might want a post capitalist future to be like It argues for a comparative anthropological critique of capital notions of value thereby initiating the search for a new set of values as well as identifying a number of selected computing practices that might evoke new values It articulates a suggestive set of institutions that could support these new values and formulates a group of measurement practices usable for evaluating the proposed institutions The book is grounded in contemporary social science political theory and critical theory It aims to leverage the possibility of alternative futures implied by some computing practices while avoiding hype and technological determinism and uses these computing practices to explicate one possible way to think about the future
