Richard Youngs Intelligence Report:

Rebuilding European Democracy Richard Youngs, 2021-09-09 In recent years serious concerns emerged over the state of European democracy Many democracy indices are reporting a year on year drift towards less liberal politics in the countries of the European Union Polls regularly suggest that the voters are coming to question democratic norms more seriously than for many decades Here Richard Youngs assesses these risks as many analysts journalists and politicians stressed the danger of Europe descending into an era of conflict driven by xenophobic nationalism and nativist authoritarians slowly dismantling liberal democratic rights In 2020 the Covid 19 pandemic has intensified these fears There is another side of the democratic equation however Youngs argues that governments EU institutions political parties citizens and civil society organisations have gradually begun to push back in defence of democracy With each chapter Youngs shows how many governmental political and social actors have developed responses to Europe s democratic malaise at multiple levels Europe s democracy problems have been grave and far reaching Yet a spirit of democratic resistance has slowly taken shape This book argues that the pro democratic fightback may be belated but it is real and has assumed significant traction with various types of democratic reform underway including citizen initiatives political party changes digital activism and EU level responses

How Autocrats Seek Power Richard L. Abel, 2024-03-26 Chronicling and analyzing resistance to the threat that autocracy poses to American liberal democracy this book provides the definitive account of the rise of Trump's populist support in 2016 and his failed efforts to nullify the result of the 2020 election This book is about the threat of autocracy which antedated Donald Trump and will persist after he leaves the stage Autocracy negates both liberalism which includes the protection of fundamental rights the rule of law separation of powers and respect for specialist expertise and democracy which requires that the state be responsible to an electorate composed of all eligible voters by concentrating unconstrained power in a single individual Anticipating defeat in the 2016 election Trump attacked suggestions that he had sought or even benefited from Russian assistance despite the evidence and he made repeated claims of election fraud In 2020 fearful that his mishandling of the pandemic had alienated voters he intensified the allegations of fraud demanding recounts pressuring state legislatures and state election officials advancing bizarre conspiracy theories and finally calling for a massive demonstration urging protesters to march to the Capitol to pressure Congress promising to accompany them But as this book documents Trump's efforts to nullify the result of the 2020 election failed As the courts rejected his numerous challenges state election officials loyally performed their statutory duties the Justice Department found no evidence of fraud and politicians from all sides certified Biden's victory this book traces the many and varied forms of the defense of liberal democracy located within both the state and civil society including law judges government lawyers and private practitioners the media NGOs science and other forms of expertise and civil servants in federal state and local government Evaluating their efficacy the book maintains is vital if as history has repeatedly taught us the price of liberal democracy like that of liberty itself is eternal vigilance This definitive account and analysis of Trumpism and the resistance to it will appeal to scholars students and others with interests in politics populism and the rule of law and more specifically to those concerned with resisting the threat that autocracy poses to liberal democracy

[Guide to Islamist Movements](#) Barry M. Rubin, **The Puzzle of Non-Western Democracy** Richard Youngs, 2015-09-08 Western democracy is being questioned around the world At the same time Western aid groups are quick to say that they are not trying to impose a particular style of democracy on others and that they are open to supporting local alternative forms of democracy This book

examines what it is about Western democracy that non Westerners are reacting negatively to and whether the critics often are equating a dislike for certain Western social or economic features with an aversion to of Western political systems It also explores the current state of debate about alternative forms of democratic practice in different regions Asia Africa the Middle East and Latin America and then puts forward ideas about how Western actors engaged in democracy support can do a better job of incorporating new thinking about alternative democratic forms into their efforts

Transatlantic Energy Relations John R. Deni, Karen Smith Stegen, 2016-04-08 Recent upheaval in the global energy system dramatic increases in demand led largely by developing countries significant decreases in supply as a result of local or regional conflicts and the growing nexus between the burning of hydrocarbons and climate change has unsettled long held notions of energy security For many years transatlantic cooperation helped undergird the system s stability but Europe and North America have drifted apart in several key ways potentially undermining the search for energy sufficiency surety and sustainability Will the transatlantic partners continue on separate paths in the face of dramatic change in the global energy system or does the breadth and depth of the challenges they confront compel them to work more closely together In this edited volume experts from across Europe and North America including advisors to the executive and legislative branches of both the EU and the United States to senior military commanders and to major international organizations and companies examine the most salient facets of the transatlantic energy relationship and discern whether that relationship is characterized by growing convergence or divergence This book was based on a special issue of the Journal of Transatlantic Studies

Europe Reset Richard Youngs, 2017-10-24 In the last decade the EU has been hit by a series of crises most recently the UK s decision to leave the union following the Brexit referendum In light of this questions have been raised about the need to reform the whole model of European integration with the aim of making the union more flexible and more accountable In this book Richard Youngs proposes an alternative vision of European co operation and shows how the EU must re invent itself if it is to survive He argues that citizens should play a greater role in European decision making that there should be radically more flexibility in the process of integration and that Europe needs to take a new more coherent approach to questions of defence and security In proposing this model for a reset version of Europe Youngs reinvigorates the debate around the future of Europe and puts forward a new agenda for the future of the EU

Climate Change and European Security Richard Youngs, 2014-10-10 It is now commonly asserted that climate change will fundamentally change international relations It has been predicted that global warming will increase conflict within and between states intensify food insecurity menace the global trading system and unleash waves of migration As a result governments are beginning to incorporate these warnings into their foreign policy initiatives The appropriateness of their incipient responses needs to be examined in finer detail This book looks at the impact of climate change on European Union EU security policy It explores how governments are reconfiguring their geo strategy and broader international relations in the wake of climate change warnings The book

demonstrates that although many aspects of EU foreign policies have begun to change climate security is not yet accorded unequivocal or sufficient priority In doing so Youngs argues that if climate change policies are to have significant effect they can no longer be treated as a separate area of policy but must be incorporated into the more mainstream debates pertinent to EU common foreign and security policy CFSP This book will be of key interest to students scholars and practitioners of climate change and policy energy and environmental policy EU governance and foreign policy European studies international relations geography security studies policy and environmental economics

The Uncertain Legacy of Crisis Richard Youngs, 2014-01-21 The European Union is mired in the worst crisis it has seen for many decades And the crisis does not stop at Europe's edge It threatens to undercut the EU's ambitions to develop a coherent and active foreign policy but it is also forcing European states to reevaluate their approach to security and defense Richard Youngs examines the legacy of the crisis and what it will mean for the EU's international role The fallout undermines the EU's foreign policy capacity and tarnishes its normative brand compelling some member states to focus on realpolitik and their own national level policies But there are also signs of enhanced European cooperation greater international ambition and deepened commitment to the values of a liberal world order Youngs details how the EU can craft an effective foreign policy strategy while confronting an internal economic crisis and a reshaped global order

The EU's Role in World Politics Richard Youngs, 2010-09-13 This book argues that in a range of policy areas trade multilateral diplomacy security development cooperation democracy and human rights energy security the EU appears to be in retreat from liberal internationalism
