**CHAPTER 2  
VENDORS**

Chapter 2 introduces students to the basic way that PCA works with vendor transactions. The first thing the students do is select

from the Navigation Bar to go to the Vendors & Purchases Navigation Center. After recording a purchase order, students record a vendor invoice using the Purchases/Receive Inventory window. The Purchases/Receive Inventory window is also the Purchases Journal. The Apply to Purchases tab is the default. The lower half of the window shows fields for Quantity, Item (inventory items), Description, GL Account, Unit Price, Amount, and Job. The default for the A/P Account is 20000, Accounts Payable. The Purchases/Receive Inventory window looks like a purchase order. Similar to other PCA windows, the icon bar appears at the top of the window.

When Bellwether Garden Supply orders and receives inventory from vendors, Account No. 12000, Inventory, is debited. Accounts Payable and the vendor account are credited. Vendors offer Bellwether a purchase discount for invoices paid within the discount period. The program defaults to 2% 10, Net 30 Days for purchase discounts.

Peachtree is a double-entry accounting system. There is a selection in Options; Global that allows general ledger accounts to be hidden. This is called Accounting Behind the Screens. The PCA windows in the textbook show the general ledger accounts. To check the Accounting Behind the Screens settings, do the following:

*Probabilistic Methods In The Theory Of Structures: Strength Of Materials, Random Vibrations, And Random Buckling* Isaac E Elishakoff, 2017-03-23 The first edition of this book appeared over three decades ago Wiley Interscience 1983 whereas the second one saw light on the verge of new millennium Dover 1999 This is third corrected and expanded edition that appears in conjunction with its companion volume Thus the reader is able to both get acquainted with the theoretical material and be able to master some of the problems following Chinese dictum I hear and I forget I see and I remember I do and I understand Confucius The main idea of the book lies in the fact that three topics probabilistic strength of materials random vibrations and probabilistic buckling are presented in a single package allowing one to see the forest in between the trees Indeed these three topics usually are presented in separate manners in different specialized books Here the reader gets a feeling of true unity of the subject at large in order to appreciate that in the end what one wants is reliability of the structure in conjunction with its operating conditions As the author describes in the Preface of the second edition this book

was not conceived ab initio as a book that author strived to compose Rather it was forced as it were upon me due to two reasons One was rather a surprising but understandable requirement in the venerable Delft University of Technology The Netherlands to prepare the lecture notes for students with the view of reducing skyrocketing costs of acquisition of textbooks by the students The other one was an unusually warm acceptance of the notes that the author prepared while at Delft University of Technology and later in Haifa at the Technion Israel Institute of Technology by the legendary engineering scientist Warner Tjardus Koiter 1914 1997 The energy necessary to prepare the second and third editions came from enthusiastic reviews that appeared in various sources Author embraced the simplicity of exposition as the main virtue following Isaac Newton s view that Truth is ever to be found in simplicity and not in the multiplicity and confusion of things
