Impact of Survivin Acetylation on its Biological Function David Dannheisig, 2017-06-06 In his research David Dannheisig investigates the influence of lysine129 acetylation on the biological function of survivin including alteration of nucleocytoplasmic shuttling as well as dimerization behavior Since survivin participates in two major hallmarks of oncogenesis namely cell death inhibition and chromosomal segregation during the cell cycle it reflects a valuable target in cancer therapy and research The author establishes proximity dependent fluorescence microscopic methods to quantify the interaction of survivin with the export receptor Crm1 as well as the homodimerization itself In the future those systems can be used to examine the feasible effect of chemical modulators which are targeting these interactions in a cellular background The outcome achieved is an essential step towards the enhancement of potential cancer therapies *The Oxford Handbook of the Law of the Sea* Donald R. Rothwell, Alex G. Oude Elferink, Karen N. Scott, Tim Stephens, 2015-03-26 Human activities have taken place in the world's oceans and seas for most of human history With such a vast number of ways in which the oceans can be used for trade exploited for natural resources and fishing as well as concerns over maritime security the legal systems regulating the rights and responsibilities of nations in their use of the world's oceans have long been a crucial part of international law The United Nations Convention on the Law of the Sea comprehensively defined the parameters of the law of the sea in 1982 and since the Convention was concluded it has seen considerable development This Oxford Handbook provides a comprehensive and original analysis of its current debates and controversies both theoretical and practical Written by over forty expert and interdisciplinary contributors the Handbook sets out how the law of the sea has developed and the challenges it is currently facing The Handbook consists of forty chapters divided into six parts First it explains the origins and evolution of the law of the sea with a particular focus upon the role of key publicists such as Hugo Grotius and John Selden the gradual development of state practice and the creation of the 1982 UN Convention It then reviews the components which comprise the maritime domain assessing their definition assertion and recognition It also analyses the ways in which coastal states or the international community can assert control over areas of the sea and the management and regulation of each of the maritime zones This includes investigating the development of the mechanisms for maritime boundary delimitation and the decisions of the International Tribunal for the Law of the Sea The Handbook also discusses the actors and intuitions that impact on the law of the sea considering their particular rights and interests in particular those of state actors and the principle law of the sea institutions Then it focuses on operational issues investigating longstanding matters of resource management and the integrated oceans framework This includes a discussion and assessment of the broad and increasingly influential integrated oceans management governance framework that interacts with the traditional law of the sea It considers six distinctive regions that have been pivotal to the development of the law of the sea before finally providing a detailed analysis of the critical contemporary issues facing the law of the sea These include threatened species
