Traveling with Sugar Amy Moran-Thomas, 2019-11-26 *Traveling with Sugar* reframes the rising diabetes epidemic as part of a five hundred year old global history of sweetness and power Amid eerie injuries

changing bodies amputated limbs and untimely deaths many people across the Caribbean and Central America simply call the affliction sugar or as some say in Belize traveling with sugar A decade in the making this book unfolds as a series of crónicas a word meaning both slow moving story and slow moving disease It profiles the careful work of those still fighting it as they grapple with unequal material infrastructures and unsettling dilemmas Facing a new incarnation of blood sugar these individuals speak back to science and policy misrecognitions that have prematurely cast their lost limbs and deaths as normal Their families arts of maintenance and repair illuminate ongoing struggles to survive and remake larger systems of food land technology and medicine

Virtue and the Moral Life William Werpehowski, Kathryn Getek Soltis, 2014-07-22 The scope of interest and reflection on virtue and the virtues is as wide and deep as the questions we can ask about what makes a moral agent's life decent or noble or holy rather than cruel or base or sinful or about the conditions of human character and circumstance that make for good relations between family members friends workers fellow citizens and strangers and the sorts of conditions that do not Clearly these questions will inevitably be directed to more finely grained features of everyday life in particular contexts *Virtue and the Moral Life* Theological and Philosophical Perspectives takes up these questions In its ten timely and original chapters it considers the specific importance of virtue ethics its public significance for shaping a society's common good the value of civic integrity warfare and returning soldiers sense of enlarged moral responsibility the care for and agency of children in contemporary secular consumer society and other questions involving moral failure humility and forgiveness

The Hamlet Fire Bryant Simon, 2020-07-23 For decades the small quiet town of Hamlet North Carolina thrived thanks to the railroad But by the 1970s it had become a postindustrial backwater a magnet for businesses in search of cheap labor and almost no oversight Imperial Food Products was one of those businesses The company set up shop in Hamlet in the 1980s Workers who complained about low pay and hazardous working conditions at the plant were silenced or fired But jobs were scarce in town so workers kept coming back and the company continued to operate with impunity Then on the morning of September 3 1991 the never inspected chicken processing plant a stone's throw from Hamlet's city hall burst into flames Twenty five people perished that day behind the plant's locked and bolted doors It remains one of the deadliest accidents ever in the history of the modern American food industry Eighty years after the Triangle Shirtwaist Fire industrial disasters were supposed to have been a thing of the past in the United States However as award winning historian Bryant Simon shows the pursuit of cheap food merged with economic decline in small towns across the South and the nation to devalue laborers and create perilous working conditions The Hamlet fire and its aftermath reveal the social costs of antiunionism lax regulations and ongoing racial discrimination Using oral histories contemporary news coverage and state records Simon has constructed a vivid potent and disturbing social autopsy of this town this factory and this time that exposes how cheap labor cheap government and cheap food came together in a way that was destined to result in tragedy

Diet for a Large Planet Chris Otter, 2020-10-12 A history of the unsustainable modern diet heavy in meat wheat and

sugar that requires more land and resources than the planet is able to support We are facing a world food crisis of unparalleled proportions Our reliance on unsustainable dietary choices and agricultural systems is causing problems both for human health and the health of our planet Solutions from lab grown food to vegan diets to strictly local food consumption are often discussed but a central question remains how did we get to this point In *Diet for a Large Planet* Chris Otter goes back to the late eighteenth century in Britain where the diet heavy in meat wheat and sugar was developing As Britain underwent steady growth urbanization industrialization and economic expansion the nation altered its food choices shifting away from locally produced plant based nutrition This new diet rich in animal proteins and refined carbohydrates made people taller and stronger but it led to new types of health problems Its production also relied on far greater acreage than Britain itself forcing the nation to become more dependent on global resources Otter shows how this issue expands beyond Britain looking at the global effects of large agro food systems that require more resources than our planet can sustain This comprehensive history helps us understand how the British played a significant role in making red meat white bread and sugar the diet of choice linked to wealth luxury and power and shows how dietary choices connect to the pressing issues of climate change and food supply
