policy evaluation considering the evolving factors affecting energy security and the energy climate policy trilemma Parts 3 to 6 discuss energy transitions in the carbon producing countries Saudi Arabia Canada Iran Russia Mexico in intermediate carbon producing consuming countries China United States UK Brazil Argentina South Africa in carbon consuming countries Germany Japan South Korea Israel India Spain and finally in carbon reduction countries France Denmark Switzerland Part 7 looks at attempts at regional international cooperation Part 8 considers the prospects for the future examining technological breakthroughs This title builds on the theme of unfolding energy transformations driven by but increasingly constrained by climate environmental considerations It is ideal for researchers and students in the areas of environmental politics and policy climate change and energy and climate security as well as for academics and professionals
