NGOs and policy makers seeking a robust and transformational approach to water and development **Life-cycle Cost Approach for Management of Environmental Resources** V. Ratna Reddy, Mathew Kurian, Reza Ardakanian, 2014-08-22

This book demonstrates the application of Life cycle Cost Approach LCCA in the management of infrastructure and other investment projects in the context of developing countries The main goal is to identify potential opportunities for the adoption LCCA in developing countries with the help of case studies and best practices The editors observe that developing countries are plagued with poor and fluctuating service delivery which affords low or no priority for environmental protection They seek to instill at the policy making level an understanding of why life cycle cost assessment is central to achieving the goals of sustainable development as well as sustainable service delivery and to influence the behavior of sector stakeholders The editors examine the evolution of LCCA from a project appraisal tool to a more comprehensive method of incorporating sustainable development aspects in a variety of sectors By providing a compendium of concepts tools and practical experiences it seeks to broaden the application of LCCA which is often limited to specific phases of the life cycle with little or no weight given to environmental aspects The aim of the book is to mainstream LCCA into governance processes at institutional levels from local to national in order to increase the ability and willingness of decision makers both users and those involved in service planning budgeting and delivery to reach better informed and more relevant choices among different types and levels of products and services **Politics and Policies for Water Resources Management in India**

M. Dinesh Kumar, 2020-06-29 This comprehensive volume explores the interface between politics and policy making in the water management sector of India The authors discuss the nature of the political discourse on water management in India and what characterizes this discourse They also explore how this discourse has influenced the process of framing water related policies in India particularly through the academics bureaucrat politician nexus and the growing influence of the civil society groups on policy makers which are the defining feature of this process and which have produced certain policy outcomes that are not supported by sufficient scientific evidence The book reveals that the social and management sciences despite being increasingly relevant in contemporary water management are unable to impress upon traditional engineer dominated water administration to seek solutions to complex water problems owing to a lack of interdisciplinary perspective in their research The authors also examine the current deadlock in undertaking sectoral reforms due to existing water policies not being honoured This collection includes several research studies which suggest legal institutional policy alternatives for addressing the problems in areas such as irrigation rural and urban water supply flood control and adaptation to climate variability and change It was originally published as a special issue of the International Journal of Water Resources Development *Infrastructure for Smart Villages* Hemanta Doloi, 2024-07-29 This book intends to initiate a fresh articulation of need based infrastructure provisions in rural contexts Departing from the conventional theories and practices of infrastructure planning and development applied in urban settings the book presents a comprehensive suite of

technical and non technical indicators that rationalise fit for purpose planning development and operations of rural infrastructure Drawing from global practices in public and private sectors and research based evidence a distinctive argument is put forward for promoting location specific infrastructure development from effectiveness practicality affordability and sustainability perspectives The argument encompasses wider social cultural and economic contexts that are unique to rural settings and the book highlights a clear roadmap of how the UN s sustainable development goals SDGs are at the core of developing rural communities with necessary infrastructure provisions that are purpose built affordable risk averse and resilient This book will provide an overview of some of the little understood and sometimes counter intuitive best practices on rural infrastructure and value based priorities that have emerged in uplifting rural communities in developing economies over the last 30 years Drawing from the global literature and practice based evidence across a complete spectrum of relevant disciplines this book will provide readers with a clear articulation of the innovative ideas around harnessing rural potential and empowering rural communities with added support in growth and progressive development in the context of interconnected infrastructure systems and improved living standards It is key reading for development planning and infrastructure courses as well as professionals and researchers involved in international development aid and provision in rural areas

The Routledge Handbook on Cities of the Global South Susan Parnell, Sophie Oldfield, 2014-03-26 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting the imperative for multiple genealogies of knowledge production as well as a diversity of empirical entry points to understand contemporary urban dynamics The Handbook works towards a geographical realignment in urban studies bringing into conversation a wide array of cities across the global south the ordinary mega global and peripheral With interdisciplinary contributions from a range of leading international experts it profiles an emergent and geographically diverse body of work The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in or of the global south arguments that are fluid and increasingly contested geographically and conceptually It reflects on critical urbanism the macro and micro scale forces that shape cities including ideological demographic and technological shifts and constantly changing global and regional economic dynamics Working with southern reference points the chapters present themes in urban politics identity and environment in ways that re frame our thinking about cities The Handbook engages the twenty first century city through a southern urban lens to stimulate scholarly professional and activist engagements with the city
