Beats: Book Reviews 2014 Manuel Augusto Antão, 2015-03-06

What it means to me to be a critic/reviewer: For a lot of readers, a reviewer or critic is an embittered failed novelist or worse, a barely restrained serial rapist. Book critics may take the form of a dilettante, theorist, essayist, or even historian, but almost never reviewers who sometimes lack the distancing from the text required by the demands of academia.

Synthesis

Noir Fiction and Film Lee Clark Mitchell, 2021

The argument of *Noir Fiction and Film* is curiously counterintuitive: that in a century of hard-boiled fiction and detective films, characteristics that at first seemed trivial swelled in importance, flourishing into crucial aspects of the genre. Among these are aimless descriptions of people and places irrelevant to plot, along with detectives consisting of little more than sparkling dialogue and flippant attitudes. What weaves together such features, however, seems to be a paradox: that a genre rooted in solving a mystery, structured around the gathering of clues, must do so by misdirecting our attention, even withholding information we think we need to generate the suspense we also desire. Yet successful noir stories and films enhance that suspense through passing diversions, descriptive details, and eccentric perspectives, rather than depending on the center pieces of plot alone: suspected motives or incriminating traces. As the greatest practitioners of the genre have realized, the how of detective fiction, its stylistic detours, draws us in more insistently than the what or the who, its linear advance. And the achievement of recent film noir is to make that how become the tantalizing object of our entire attention, shorn of any pretense of reading for the plot, immersing us in the diversionary delight that has animated the genre from the beginning.

Make Me (with bonus short story Small Wars) Lee Child, 2016-03-29

1 NEW YORK TIMES BESTSELLER Don't miss the hit streaming series *Reacher*. ONE OF THE BEST BOOKS OF THE YEAR *Los Angeles Times* *The Guardian* *Suspense* magazine Stephen King calls Jack Reacher the coolest continuing series character, and now he's back in this masterly new thriller from Lee Child. Why is this town called Mother's Rest? That's all Reacher wants to know. But no one will tell him. It's a tiny place hidden in a thousand square miles of wheat fields, with a railroad stop and sullen and watchful people, and a worried woman named Michelle Chang who mistakes him for someone else, her missing partner in a private investigation she thinks must have started small and then turned lethal. Reacher has no particular place to go, and all the time in the world to get there, and there's something about Chang so he teams up with her and starts to ask around. He thinks: How bad can this thing be? But before long, he's plunged into a desperate race through LA, Chicago, Phoenix, and San Francisco, and through the hidden parts of the internet, up against thugs and assassins every step of the way, right back to where he started in Mother's Rest, where he must confront the worst.

nightmare he could imagine Walking away would have been easier But as always Reacher s rule is If you want me to stop you re going to have to make me

Evolutionary Intelligence W. Russell Neuman,2023-09-26 A surprising vision of how human intelligence will coevolve with digital technology and revolutionize how we think and behave It is natural for us to fear artificial intelligence But does Siri really want to kill us Perhaps we are falling into the trap of projecting human traits onto the machines we might build In *Evolutionary Intelligence* Neuman offers a surprisingly positive vision in which computational intelligence compensates for the well recognized limits of human judgment improves decision making and actually increases our agency In artful accessible and adventurous prose Neuman takes the reader on an exciting fast paced ride all the while making a convincing case about a revolution in computationally augmented human intelligence Neuman argues that just as the wheel made us mobile and machines made us stronger the migration of artificial intelligence from room sized computers to laptops to our watches smart glasses and even smart contact lenses will transform day to day human decision making If intelligence is the capacity to match means with ends then augmented intelligence can offer the ability to adapt to changing environments as we face the ultimate challenge of long term survival Tapping into a global interest in technology s potential impacts on society economics and culture *Evolutionary Intelligence* demonstrates that our future depends on our ability to computationally compensate for the limitations of a human cognitive system that has only recently graduated from hunting and gathering
