Despite the low cost of Arduino you're still committing about \$30 worth of hardware every time you build a project that has an Arduino inside. This is where Adafruit's Trinket comes in: Arduino compatible, one-third the price, and low power. The Trinket lets you make inexpensive and powerful programmable electronic projects. Written by one of the authors of Adafruit's Trinket documentation, *Getting Started with Trinket* gets you up and running quickly with this board and gives you some great projects to inspire your own creations.
