Claude Lévi-Strauss Patrick Wilcken, 2010-10-07

When Claude Lévi Strauss passed away in 2009 at age 100 France celebrated the life and contributions of not only a preeminent anthropologist but one of the defining intellectuals of the 20th century Just as Freud had shaken up the antiquarian discipline of psychiatry so had Lévi Strauss revolutionized anthropology transforming it from the colonial era study of exotic tribes to one consumed with fundamental questions about the nature of humanity and civilization itself Remarkably there has never been a biography in English of the enigmatic Claude Lévi Strauss Drawing on a welter of original research and interviews with the anthropologist Patrick Wilcken's *Claude Lévi Strauss* fills this void In rich detail Wilcken recreates Lévi Strauss's peripatetic life his groundbreaking fieldwork in some of the remotest reaches of the Amazon in the 1930s his years as a Jew in Nazi occupied France and an emigré in wartime New York and his return to Paris in the late 1940s where he clashed with Jean Paul Sartre and fundamentally influenced fellow postwar thinkers from Jacques Lacan to Michel Foucault and Roland Barthes It was in France that structuralism the school of thought he founded first took hold creating waves far beyond the field of anthropology In his heyday Lévi Strauss was both a hero to contemporary intellectuals and an international celebrity In *Claude Lévi Strauss* Wilcken gives the reader a fascinating intellectual tour of the anthropologist's landmark works *Tristes Tropiques* his most famous book a literary meditation on his travels and fieldwork *The Savage Mind* which showed that primitive people are driven by the same intellectual curiosities as their Western counterparts and finally his monumental four volume *Mythologiques* a study of the universal structures of native mythology in the Americas In the years that Lévi Strauss published these pioneering works Wilcken observes tribal societies seemed to hold the answers to the most profound questions about the human mind Following the great anthropologist from São Paulo to the Brazilian interior

and from New York to Paris Patrick Wilcken's *Claude Lévi Strauss* is both an evocative journey and an intellectual biography of one of the 20th century's most influential minds *Knowledge of Things Human and Divine* Donald Phillip Verene, 2008-10-01 This is the first book to examine in full the interconnections between Giambattista Vico's new science and James Joyce's *Finnegans Wake* Maintaining that Joyce is the greatest modern interpreter of Vico Donald Phillip Verene demonstrates how images from Joyce's work offer keys to Vico's philosophy Verene presents the entire course of Vico's philosophical thought as it develops in his major works with Joyce's words and insights serving as a guide The book devotes a chapter to each period of Vico's thought from his early orations on education to his anti Cartesian metaphysics and his conception of universal law culminating in his new science of the history of nations Verene analyzes Vico's major works including all three editions of the *New Science* The volume also features a detailed chronology of the philosopher's career historical illustrations related to his works and an extensive bibliography of Vico scholarship and all English translations of his writings [Meet the Philosophers of Ancient Greece](#) Patricia F.
