Cristina Vega, Francisco J. Fernández, 2024-03-20 This edited volume discusses the identification discovery characterization structure determination and modeling of multicomponent macromolecular complexes and as such it fully complements the first volume ISBN 978 3 319 27214 6 which targeted methods of recombinant production of protein complexes This book is divided in 8 sections offering a selection of technologies widely used in the characterization of protein and protein nucleic acid complexes for different purposes and at different scales From native electrophoresis methods that are accessible to any reasonably well equipped laboratory to the sophisticated setup required for structure determination by cryo electron microscopy or X ray crystallography this book contains a wide variety of clearly explained analytic and preparative approaches connected with the production techniques developed on the previous volume The readers will find an integral connection between this book

and the first volume which ensures a comprehensive and updated discussion of the main topics of the discipline Taken together these volumes constitute a cohesive and authoritative source of the research on multicomponent macromolecular complexes In here we focus on characterization of protein complexes in the broadest sense which is not typically covered in other sources Moreover all chapters are carefully written by world renowned scientists and active researchers making this volume ideal not only as a reference source but also as a companion book for the daily laboratory work This book is aimed for a wide range of scientists from science students to experienced researchers working on protein and protein nucleic acid complexes who need a thorough understanding of protein production and complex characterization **Practical**

Applications of Medical Geology Malcolm Siegel, Olle Selinus, Robert Finkelman, 2021-08-01 This edited volume provides a framework for integrating methods and information drawn from geological and medical sciences and provides case studies in medical geology to illustrate the usefulness of this framework for crafting environmental and public health policies related to natural materials The relevance of medical geology research to policy decisions is a topic rarely discussed and this volume attempts to be a unique source for researchers and policy makers in the field of medical geology in addressing this gap in practical medical geology applications The book's four sections establish this framework in detail using risk assessment case studies data analyses and specific medical geology techniques Following an introduction to medical geology in the context of risk assessment and risk management the second section discusses specific methods used in medical geology in the categories of geoscience biomedicine and data sources The third section discusses the medical geology of natural materials energy use and environmental and workplace impacts This section includes specific case studies in medical geology and describes how the methods and data from the previous section are used in a medical geology analysis The fourth section includes a guide to the medical geology literature and provides some examples of medical geology programs in Asia and Africa **Microbial Metagenomics, Metatranscriptomics, and Metaproteomics**, 2013-09-19 This new volume of
