[Philosophy and Occupational Therapy](#) Steven Taff, 2024-06-01

Philosophy and Occupational Therapy: Informing Education Research and Practice provides an overview of the most influential philosophical movements from past to present and shows how these philosophies are a foundational yet underutilized element of occupational therapy education, research, and practice. Editor Steven D. Taff, PhD, OTR/L, FNAP, FAOTA, fills a gap in existing occupational therapy literature by exploring the major thinkers and concepts of numerous different philosophical movements and examining their implications. Taff and a multitude of chapter authors demonstrate that the vital points of human existence are found in philosophy as well as science and that occupational therapy should incorporate a clearly articulated philosophical perspective into its evidence-based and measurement-driven paradigm. Each chapter offers a basic description of a philosophy, outlines major thinkers and concepts, and ultimately summarizes the implications for occupational therapy education, research, and practice. [Philosophy and Occupational Therapy: Informing Education Research and Practice](#) is a unique and essential book for occupational therapy educators, researchers, and clinicians that will enrich the teaching and learning process, ground research with depth and clarity, and spark discussion among professionals about reviving the use of philosophy in current occupational therapy practice.
