Quality Assurance Practices In Higher Education:

Quality Assurance in Higher Education Don F. Westerheijden, Bjorn Stensaker, Maria Joao Rosa, 2007-09-04 By bringing together leading experts on quality assurance in higher education from seven countries from Europe the USA and South Africa this volume intends to go several steps further than most publications on quality assurance First it brings together views from micro to macro levels in the multi actor space showing how quality assurance impacts the higher education system throughout Second it links quality assurance solidly to issues of regulation translation rather than mechanical implementation and transformation instead of being only focused on quality assurance as a single policy instrument Third it uses this broad range of research insights to criticize current practices explaining for instance why sometimes people have difficulty in tracing any concrete effects of all initiatives taken in this area Finally the book offers proposals for better focusing quality assurance in the future to address institutional challenges better The general purpose of the book then is to give an engaged academic reflection on how quality assurance is embedded in higher education and in a dynamic way to assess its impacts and potential improvements Quality Assurance in Higher Education Maria João Rosa, A. Amaral, 2014-02-27 This book weighs up the consequences of introducing Quality Enhancement and Risk Management as new dimensions in Higher Education quality control on a global scale The authors include Chief Executive Officers of Quality Agencies policy analysts and leading scholars in Quality Evaluation and Comparative Higher Education policy analysis

Higher Education Quality Assurance in Sub-Saharan Africa Peter Nicolas Materu,2007 This report assesses the status and practice of higher education quality assurance in Sub Sahara Africa focusing on degree granting tertiary institutions A main finding is that structured

national level quality assurance processes in African higher education are a very recent phenomenon and that most countries face major capacity constraints. Only about a third of them have established structured national quality assurance mechanisms, often only as recently as during the last ten years. Activities differ in their scope and rigor, ranging from simple licensing of institutions by the minister responsible for higher education to comprehensive system-wide program accreditation and ranking of institutions. Within institutions of higher learning, self-assessment and academic audits are gradually being adopted to supplement traditional quality assurance methods. However, knowledge about and experience with self-assessments are limited. The main challenges to the quality assurance system in Africa are cost and human capacity requirements. For countries with large tertiary systems, the report recommends institutional rather than program accreditation as a cost-effective option. However, where tertiary systems are small and underdeveloped, a less formal self-assessment for each institution may be necessary until the capacity could be strengthened to support a more formal national quality assurance agency in the long run.

Toward Quality Assurance and Excellence in Higher Education Ahmed Odeh Al Jaber, 2022-09-01. Quality Assurance is not a new concept in the education sector in general and higher education in particular, though it is becoming increasingly more relevant and important. Higher education helps to improve an individual's quality of life by enabling them to inflate their knowledge and expertise to grasp abstract concepts and theories and to raise their awareness of the world and their community and, as such, the assurance of quality is becoming more pivotal in the whole education process. There is no simple definition of the concept of quality in education, though numerous models and theories have been devised. Toward Quality Assurance and Excellence of Higher Education is a new episode of the Quality Assurance perception in higher education, which identifies the quality culture and orientation from the beginning, integrating crucial factors to build a pyramid of higher education excellence. The book compares concepts from the main theories of Quality Assurance management and control when they are applied to educational systems in higher education. The book also presents a new model of excellence in higher education. Excellence is an architecture of building blocks that comes with process performance, effectiveness, harmony, and collaboration, which should be incorporated in a quality-oriented concept of a sustainable excellence of higher education. The model integrates four main facets: the Educational System, Quality Assurance, Managing and Control, Strategic Planning, and Globalization. Also presented are international best practices in quality assurance in higher education from Japan and Finland.
