Inclusive and Transformative Livestock Production in the Tropics and Subtropics Stefan Burkart,Renee Marie Bullock,Juan Andrés Cardoso Arango,Marcela Ramos ,Natalia Triana Angel,2024-10-14 Social research has provided critical

insights into understanding gender and generational gaps and the ways that power relations create differentiated access to agricultural and livestock technologies and services Many of these technologies and services such as improved feed options grass legume associations silvo pastoral systems improved animal genetics health and welfare grazing management and associated water and soil health and manure management have the potential to improve livelihoods sustainability food security and generational transfer dynamics Their adoption contributes to mitigating many of the impacts the livestock sector has on the environment through for example reducing greenhouse gas emissions and deforestation increasing biodiversity restoration and land sparing Likewise their adoption helps producers adapt to climate change *Smart Economy in Smart Cities* T. M. Vinod Kumar, 2016-08-25 The present book highlights studies that show how smart cities promote urban economic development The book surveys the state of the art of Smart City Economic Development through a literature survey The book uses 13 in depth city research case studies in 10 countries such as the North America Europe Africa and Asia to explain how a smart economy changes the urban spatial system and vice versa This book focuses on exploratory city studies in different countries which investigate how urban spatial systems adapt to the specific needs of smart urban economy The theory of smart city economic development is not yet entirely understood and applied in metropolitan regional plans Smart urban economies are largely the result of the influence of ICT applications on all aspects of urban economy which in turn changes the land use system It points out that the dynamics of smart city GDP creation takes different paths which need further empirical study hypothesis testing and mathematical modelling Although there are hypotheses on how smart cities generate wealth and social benefits for nations there are no significant empirical studies available on how they generate urban economic development through urban spatial adaptation This book with 13 cities research studies is one attempt to fill in the gap in knowledge base

FAO/INFOODS Food Composition Table for Western Africa (2019) / Table de composition des aliments FAO/INFOODS pour l'Afrique de l'Ouest (2019) Food and Agriculture Organization of the United Nations, 2020-02-20 Food composition data are useful throughout the food system for nutrition sensitive agriculture improved processing methods that ensure greater nutrient retention in foods nutrition labelling and to inform educate and protect consumers through food based dietary guidelines nutrition education and communication and legislation The FAO INFOODS Food Composition Table for Western Africa WAFCT 2019 is an update of the West African Food Composition Table of 2012 which lacked some important components foods and recipes WAFCT 2019 contains almost three times as many food entries and double the number of components with increased overall data quality Many of the data points from WAFCT 2012 have been replaced with better data mostly analytical data from Africa with a special emphasis on Western Africa These improvements are essential to understanding the nutrient composition of foods in the region and to promoting their appropriate use WAFCT 2019 is the result of four years of collaboration among INFOODS network researchers in Africa and the Nutrition and Food Systems Division of FAO and was developed as part of the International Dietary Data Expansion

INDDEX Project implemented by Tufts University's Gerald J and Dorothy R Friedman School of Nutrition Science and Policy with funding from the Bill Melinda Gates Foundation. These new data from WAFCT 2019 will support further research towards an expanded and improved evidence base and will support better more informed decisions and effective policies and programmes for improved nutrition in Africa.

Renewable Energies for Sustainable Development M. Dolores Esteban, José-Santos López-Gutiérrez, Vicente Negro, 2021-08-18. In the current scenario in which climate change dominates our lives and in which we all need to combat and drastically reduce the emission of greenhouse gases, renewable energies play key roles as present and future energy sources. Renewable energies vary across a wide range and therefore there are related studies for each type of energy. This Special Issue is composed of studies integrating the latest research innovations and knowledge focused on all types of renewable energy: onshore and offshore wind, photovoltaic solar, biomass, geothermal, waves, tides, hydro, etc. Authors were invited to submit review and research papers focused on energy resource estimation, all types of TRL converters, civil infrastructure, electrical connection, environmental studies, licensing and development of facilities, construction, operation and maintenance, mechanical and structural analysis, new materials for these facilities, etc. Analyses of a combination of several renewable energies as well as storage systems to progress the development of these sustainable energies were welcomed.
