Corporate Behavior and Sustainability Güler Aras, Coral Ingley, 2016-10-04. Companies can no longer expect to engage in dubious or unethical corporate behaviour without risking their reputation and damaging, perhaps irrevocably, their market position. Irresponsible corporate behavior not only deprives shareholders of long-term returns but also ultimately imposes a cost on society as a whole. Sustainable business is about ensuring that entities contribute toward positive social, environmental and economic outcomes. Bad business behaviour is costly for stakeholders, for markets, for society and the economy alike. To ensure that a company behaves well, the buy-in of the leadership team is crucial. The full commitment of the board of directors in conjunction with the senior managers of the organization is required if an

organization is to be socially responsible In this sense leadership does not reside with an individual the CEO within the organization but with all of those at the apex of corporate power and control Effective change management requires enlightened and capable leadership to instigate and drive the process of embedding a sustainable and socially responsible corporate philosophy and culture that supports good business decision making A profound understanding of the requirements of such a leadership process will help corporate managers become highly effective change agents Governance will be the main driver of this change For the economy and financial markets to become sustainable and resilient radical changes in corporate leadership need to take place Integrated reporting government regulation and international standards will all be important factors in bringing about this change As well as understanding the effects of corporate behavior on financial markets such an understanding is also now imperative in relation to the social and environmental contexts
