Boyd, 2017-01-04 The sculpture of the early bronze age Cyclades has been systematically studied since the time of Christos Tsountas at the end of the 19th century But that study has been hampered by the circumstance that so many of the subsequent finds come from unauthorized excavations where the archaeological context was irretrievably lost Largely for that reason there are still many problems surrounding the chronology the function and the meaning of Early Cycladic sculpture This lavishly illustrated and comprehensive reassessment sets out to rectify that situation by publishing finds which have been recovered in controlled excavations in recent years as well as earlier finds for which better documentation can

now be provided Using the material from recent excavation projects and drawing on the papers presented at a symposium held in Athens in 2014 it is possible now to undertake a fresh overview of the entire body of sculpture from the Cycladic islands which has been found in secure archaeological contexts Beginning with early examples from Neolithic settlement sites and extending into a consideration of material found in later contexts the 35 chapters are divided into sections which examine sculpture from settlements cemeteries and the sanctuary at Kavos concluding with a discussion of material techniques and aspects of manufacture

Traditional Leaders in a Democracy MISTRA MISTRA, 2019-03-29 Post 1994 South Africa's traditional leaders have fought for recognition and positioned themselves as major players in the South African political landscape Yet their role in a democracy is contested with leaders often accused of abusing power disregarding human rights expropriating resources and promoting tribalism Some argue that democracy and traditional leadership are irredeemably opposed and cannot co exist Meanwhile shifts in the political economy of the former bantustans the introduction of platinum mining in particular have attracted new interests and conflicts to these areas with chiefs often designated as custodians of community interests This edited volume explores how chieftancy is practised experienced and contested in contemporary South Africa It includes case studies of how those living under the authority of chiefs in a modern democracy negotiate or resist this authority in their respective areas Chapters in this book are organised around three major sites of contest leadership land and law

Resistance to and Acquiescence in Apartheid Henry Mbaya, 2018-09-11 This book documents the history of a major Provincial Anglican theological college in Grahamstown St Paul's Theological College that existed against the backdrop of colonialism and apartheid Mbaya fundamentally attempts to explore a narrative of certain socio economic cultural and political struggles Resistance to and Acquiescence in Apartheid contextualises the mission of the Church in theological education during a period of deeply rooted inequality Thus one is left to ask the question What missionary role did St Paul's College play in the context of apartheid

Understanding Higher Education Chrissie Bowie, Sioux McKenna, 2021-08-23 Drawing on the South African case this book looks at shifts in higher education around the world in the last two decades In South Africa calls for transformation have been heard in the university since the last days of apartheid Similar claims for quality higher education to be made available to all have been made across the African continent In spite of this inequalities remain and many would argue that these have been exacerbated during the Covid pandemic Understanding Higher Education responds to these calls by arguing for a social account of teaching and learning by contesting dominant understandings of students as decontextualised learners premised on the idea that the university is a meritocracy This book tackles the issue of teaching and learning by looking both within and beyond the

classroom It looks at how higher education policies emerged from the notion of the knowledge economy in the newly democratic South Africa and how national qualification frameworks and other processes brought the country more closely into conversation with the global order The effects of this on staffing and curriculum structures are considered alongside a proposition for alternative ways of understanding the role of higher education in society *#RhodesMustFall* B.
