

Mr. and Mrs. John J. Miller House

1952

1411 Arlington Avenue
San Carlos, California

254

Though only 1380 square feet, this one bedroom-and-study dwelling still had two entrances and a lively interaction with the outdoors in its redlines on the schematic design plans. Neutra switched the position of the sink and the stove so that the sink faced the windows and lovely views to the north. The single move, which also permitted the person at the sink to observe approaching visitors, thus addressed two biomimetic needs simultaneously: that of engaging the environment and that of empowering the owner to decide whether to "stay, fight or fly".

Das Haus umfaßt auf 128 m² nur je ein einziges Arbeits- und Schlafzimmer, hat aber dennoch zwei Eingänge und unterhält köstliche Wechselbeziehungen mit der Umgebung. In den Entwurfsplänen vertauschte Neutra Herd und Spüle, so daß man beim Abwaschen nicht nur einen herrlichen Ausblick nach Norden genießt, sondern auch den Zugang im Blick hat. Auf diese Weise setzte Neutra zwei biomimetische Bedürfnisse um: Er stellte den Bezug zur Natur her und ermöglichte dem Besitzer die Entscheidung zu „bleiben, kämpfen oder fliehen“.

Ben que ne mesurant même pas 128 m², ce petit pavillon d'une chambre et un bureau possède néanmoins deux entrées et multiplie les interactions avec l'extérieur. Dans ses corrections sur plans, Neutra intervint la position de l'évier et de la cuisinière pour que l'évier se trouve face aux fenêtres et à la vue vers le nord. Ce simple mouvement, qui permettait à la personne rési-

Richard Neutra Barbara Mac Lamprecht, 2010 **Tremaine Houses** Volker M. Welter, 2019-11-19 This volume analyzes the extraordinary patronage of modern architecture that the Tremaine family sustained for nearly four decades in the mid twentieth century From the late 1930s to the early 1970s two brothers Burton G Tremaine and Warren D Tremaine and their respective wives Emily Hall Tremaine and Katharine Williams Tremaine commissioned approximately thirty architecture and design projects Richard Neutra and Oscar Niemeyer designed the best known Tremaine houses Philip Johnson and Frank Lloyd Wright also created designs and buildings for the family that achieved iconic status in the modern movement Focusing on the Tremaines houses and other projects such as a visitor center at the meteor crater in Arizona this volume explores the Tremaines architectural patronage in terms of the family's motivations and values exposing patterns in what may appear as an eclectic collection of modern architecture Architectural historian Volker M Welter argues that the Tremaines patronage was not driven by any single factor rather it stemmed from a network of motives comprising the clients practical requirements their private and public lives and their ideas about architecture and art Richard Neutra's Miller House Stephen Leet, 2004-04 In 1937 the architect and his sophisticated client produced a masterwork of forward thinking and artful architecture *Richard Neutra* Christie's Realty International, Inc, 2008 The Greenwood Encyclopedia of Homes through World History James M. Steele, 2009-03-30 The house throughout history in every place in the world has been built to provide shelter from the elements The dwellings that have resulted are as different as the people that have built them the social norms that prevailed at the time and place in which they were built and the natural environment that they adapted to Studying them now in a comprehensive way allows us to understand the social political economic and religious conditions that existed for their inhabitants They are a three dimensional record of culture Twenty four pages of color images along with black and white images through three volumes illustrate the homes of people throughout the world The volumes cover ancient times to the late Middle Ages the Renaissance to the Industrial Revolution and the Post Industrial Revolution to the Present **Between Concept and Identity** Esteban Fernández-Cobián, 2014-10-02 The identity of places of worship is one of the most difficult problems faced by religious architecture at the start of this new millennium Contemporary globalising experiences demand peremptorily a reflection both conceptual and situational on the origin of objects people and institutions Nevertheless the chance of these migration flows annihilating already existing religious identities is perceived as a problem This problem is directly linked to the survival of architecture as a system carrying a material representation of the divine and constituting a self reference system for the community of believers Therefore it is important to define the extent to which the new religious architecture has given room to an abstract type of formal experimentation which is disconnected from social reality Does this architecture maintain its bridging sacramental value or on the contrary has it given way to the conceptualist trends still alive in the artistic world Is metaphor a valid concept for the Christian religion Is there an essential aspect linking

this architecture to the centuries old tradition of the Catholic Church Different architectural pedagogical exhibition and formal initiatives have arisen in recent years and it is necessary to get to know them with the purpose of understanding where contemporary religious architecture is heading in its eternal search for a permanent identity Plans, Sections and Elevations Richard Weston,2004 CD ROM contains files for all of the plans sections and elevations included in the book

Nothing Permanent Todd Cronan, 2023-06-20 A critical look at the competing motivations behind one of modern architecture s most widely known and misunderstood movements Although mid century

modern has evolved into a highly popular and ubiquitous architectural style this term obscures the varied perspectives and approaches of its original practitioners In *Nothing Permanent* Todd Cronan displaces generalizations with a nuanced intellectual history of architectural innovation in California between 1920 and 1970 uncovering the conflicting intentions that would go on to reshape the future of American domestic life Focusing on four primary figures R M Schindler Richard Neutra and Charles and Ray Eames *Nothing Permanent* demonstrates how this prolific era of modern architecture in California rather than constituting a homogenous movement was propelled by disparate approaches and aims Exemplified by the twin pillars of Schindler and Neutra and their respective ideological factions these two groups of architects represent opposing poles of architectural intentionality embodying divergent views about the dynamic between interior and exterior the idea of permanence and the extent to which architects could exercise control over the inhabitants of their structures Looking past California modernism's surface level idealization in present day style guides home decor publications films and television shows *Nothing Permanent* details the intellectual aesthetic and practical debates that lie at the roots of this complex architectural moment Extracting this period from its diffusion into visual culture Cronan argues that mid century architecture in California raised questions about the meaning of architecture and design that remain urgent today **A**

Topology of Everyday Constellations Georges Teyssot, 2013-02-22 The threshold as both boundary and bridge investigations of spaces public and private local and global Today spaces no longer represent a bourgeois haven nor are they the sites of a classical harmony between work and leisure private and public the local and the global The house is not merely a home but a position for negotiations with multiple spheres the technological as well as the physical and the psychological In *A Topology of Everyday Constellations* Georges Teyssot considers the intrusion of the public sphere into private space and the blurring of notions of interior privacy and intimacy in our societies He proposes that we rethink design in terms of a new definition of the practices of everyday life Teyssot considers the door the window the mirror and the screen as thresholds or interstitial spaces that divide the world in two the outside and the inside Thresholds he suggests work both as markers of boundaries and as bridges to the exterior The stark choice between boundary and bridge creates a middle space an in between that holds the possibility of exchanges and encounters If the threshold no longer separates public from private and if we can no longer think of the house as a bastion of privacy Teyssot asks does the body still inhabit the house or does the house evolving into a series of microdevices inhabit the body
