

## Sample Essay on Ethics

Ethics is defined as the comprehension of what is right and what is wrong within the moral context and different cultures and communities have a different perception of right and wrong depending on their individual regulations, religious beliefs, as well as cultural practices. Regardless of the setting, ethics are usually formulated to ensure that individuals choose right over wrong when faced with different decisions. The business world has various codes of ethics that have been written to guide the professionals of different fields. Nevertheless, despite the existence of these codes, the ethical dilemmas are more often than not difficult to resolve. Utilitarianism, egoism, deontology, virtue ethics, and care ethics are some of the ethical theories that philosophy has cited in resolving ethical dilemmas. Such theories are designed with intention of preventing ethical violations which may pave way for the exploitation of those who are less powerful within the business world. Quotes from famous philosophers in the world are evidence and implications of the existence of such exploitation as rooted in history. Some of these quotes include '*Charity is no substitute for justice withheld*' by St. Augustine and '*The price good men pay for indifference to public affairs is to be ruled by evil men*' by Plato. This paper gives an in-depth analysis of the connection between different ethical aspects.

The quote '*Charity is no substitute for justice withheld*' by St. Augustine has raised a debate with regards to charity versus justice. Both charity and justice are very noble social aspects because they reflect the will and desire to help another individual. Charity, for instance, is the act of giving to the less fortunate in the society with the intention of improving their lives. On the other hand, justice entails enforcing fair conducts and distributing these equally to make sure that every person has a chance to lead a better life. St. Augustine asserts that the role of these two important social aspects differs and as such it is impossible

research project and ethical considerations      **Journal Article Writing and Publication** Sharon A. Gutman, 2024-06-01

The ability to demonstrate that a specific health care profession provides valuable and effective services that meet society's health needs is a major objective for all health care academicians and researchers. Such skills are critical to ensure service reimbursement from an increasingly small pool of health care dollars. Demonstrating clinical effectiveness depends on the reporting of written research results through journal publication so that the health care community and larger society will be able to access and read evidence supporting health care services. Today several clinical reporting standard guidelines have been created by researchers to enhance the ability of readers to evaluate the quality and value of studies. *Journal Article Writing and Publication* is the first text to compile those clinical research reporting standards in one source and helps educators and novice researchers to better understand the skills needed for journal publication. Health care researchers must begin using these reporting standards in order to write manuscripts that are both correctly formatted and transparently convey all critical study strengths and limitations. Educators must teach these reporting standards to students who must evaluate research reports as consumers and possible future contributors to the literature through their own writing. *Journal Article Writing and Publication* by Dr. Sharon A. Gutman, a former editor of the *American Journal of Occupational Therapy*, provides specific guidelines based on the most commonly accepted reporting standards for the preparation and writing of general research studies, intervention effectiveness studies, instrument development and testing studies, and case reports. A section is devoted to helping authors understand the rules governing the reporting of statistical data in text and tables. Separate sections help authors understand the manuscript preparation and submission process, the revision process, and the etiquette guiding communication with editors and reviewers. Guidelines for the preparation of scholarly discussion papers and editorials are also provided. *Journal Article Writing and Publication* also features a section that aims to help doctoral students and newly minted faculty turn academic work and dissertations into publishable journal articles. Suggestions are provided to help clinicians turn clinical data into research databases that could serve as the foundation for pilot studies. Finally, information is provided to help authors better understand the ethical considerations of publication, including plagiarism, dual submissions, inappropriate authorship, copyright, and conflict of interest.
