[Love, Money, and Parenting](#) Matthias Doepke,Fabrizio Zilibotti,2020-11-03 Doepke and Zilibotti investigate how economic forces shape how parents raise their children They show that in countries with increasing economic inequality such as the United States parents push harder to ensure their children have a path to security and success Economics has transformed the hands off parenting of the 1960s and 70s into a frantic overscheduled activity

Growing inequality has also resulted in an increasing parenting gap between richer and poorer families raising the disturbing prospect of diminished social mobility and fewer opportunities for children from disadvantaged backgrounds The authors discuss how investments in early childhood development and the design of education systems factor into the parenting equation and how economics can help shape policies that will contribute to the ideal of equal opportunity for all From publisher description
