Cross-Border Management Rongxing Guo,2015-01-05 This book presents a new approach to management in an increasingly interactive world In this context the use of the word new has two meanings The first relates to a new definition of borders which are natural institutional functional or mixed the second concerns the fact that the book applies and where necessary develops analytical tools methods and models that are different from those used in other similar books The objectives of this book are to clarify whether existing management theories and methods can be effectively applied in an entity which can be defined as a sovereign country a region a community a culture or a firm as the latter increasingly interacts with the rest of the world to develop qualitative and quantitative methods to help leaders make optimal decisions for their entity and at the same time to maximize the positive or minimize the negative effects of those decisions on the rest of the world and to design workable cross border cooperation plans and conflict management schemes that allow policy makers to better cope with the challenges and problems posed by our increasingly interactive world

Andreas,Frank, Sybille,Million, Angela,Misselwitz, Philipp,Schlaack, Johanna,Schröder, Carolin,2016-11-30 The Smart City

paradigm aims at resource efficient urban development by means of ICT implementation Cities where we work and conduct our research are building Smart City strategies and that research institutions increasingly fund research into the development of smart infrastructure and Smart Cities are considered a radical paradigm shift and motors of technological innovation economic growth higher quality of life efficiency and risk control in the face of shrinking resources and impending climate change This smartification is contrasted by increasing calls by civil society and urban social movements for more encompassing inclusion in decision making New urban actors are acquiring agency through situated knowledge local expertise social networking and cooperation and collaboration skills Behind these movements a seemingly parallel discourse to the Smart City paradigm is gaining ground the discourse of the commons Commons are defined as the combination of resources people and practices resources which are defined and managed by a group of people of commoners and a practice of commoning that looks after takes care for and fosters this resource without exhausting it Commoning is a practice that seems closer than any other practice to a sustainable way of life Are these two discourses the discourse on the Smart City and the discourse on the urban commons irreconcilable antagonists or do they share a common ground which needs to be uncovered developed and advocated This question is by no means merely theoretical It is also a very practical question which pertains to the management and distribution of the resources we depend on It is a very political question as it demands negotiation and the taking of sides And it is an ethical question in that it relates to how we respect and stand up for each other our fellow human beings and also the non human nature for which we are responsible The essays and transcripts of the symposium Beware of Smart People want to make a first contribution and stimulate future research in the field Das Paradigma der Smart City ist Ausdruck der Ambition Stadtentwicklung durch die Anwendung von IKT effizient und Ressourcen schonend zu gestalten St dte in denen wir arbeiten und ber die wir forschen entwickeln Smart City Strategien und Forschungsf rderung spezialisiert sich zunehmend auf die Entwicklung smarter Infrastrukturen und Steuerungsmechanismen Smart Cities werden als radikaler Paradigmenwechsel gelesen und als Motoren technologischer Entwicklung konomisches Wachstum h here Lebensqualit t Effizienz und Risikokontrolle angesichts abnehmender Ressourcen und drohenden Klimawandels Dieser Smartifizierung stehen die zunehmenden Forderungen zivilgesellschaftlicher Gruppen und sozialer Bewegungen f r mehr und umfassendere Einbindung in Entscheidungsprozesse entgegen Neue urbane Akteure werden zu Agenten indem sie ihre Erfahrungswissen ihre lokalen Kenntnisse ihre sozialen Netzwerke und F higkeiten zur Kooperation und Kollaboration einbringen Hintergrund diese Bewegungen ist ein augenscheinlich paralleler Diskurs zur Smart City welcher sich zunehmend Geh r verschafft der Diskurs ber die Gemeing ter die Commons Commons werden definiert als das Zusammenspiel von Ressourcen Menschen und Praktiken Ressourcen die von einer Gemeinschaft den Commonern definiert und verwaltet werden und eine Praxis des Commoning welche die Ressource schonend bewirtschaftet ohne sie zu verbrauchen In diesem Sinne scheint Commoning eine Praxis die einer

nachhaltigen Lebensweise am nächsten kommt. Sind diese zwei Diskurse der Diskurs über die Smart City und jener über die urbanen Gemeinschaften unvereinbare Antagonisten oder teilen sie Gemeinsamkeiten, welche offen gelegt, weiter entwickelt und verfechtet werden sollten? Diese Frage ist keineswegs eine rein theoretische. Sie ist eine sehr praktische Frage, da sie auf die Verteilung und das Management lebenswichtiger Ressourcen zielt. Sie ist eine politische Frage, da sie Auseinandersetzung und Parteinahme einfordert. Und sie ist eine ethische Frage, denn sie fordert gegenseitigen Respekt und Einsatz ein für unsere Mitmenschen sowie für die nichtmenschliche Natur, für die wir Verantwortung tragen. Die Texte und Aufzeichnungen des Symposiums *Beware of Smart People* wollen hierzu einen Beitrag leisten und zukünftige Forschungsvorhaben stimulieren.
