1.1 Aim

(1)

1.2 Apparatus and method

(5)

2. Observations and Recording of results (Copy the table below onto your book or sheet of paper and transfer the results you recorded when conducting the experiment). Calculate  $pV$  for each set of results and record your answers in the table.

Volume (V) $\text{cm}^3$	Pressure (p) kPa		$pV$ (J)

(6)

3. Analysis of the results:

3.1 Identify the following variables for the experiment:

- Independent
- Dependent
- Controlled

(3)

3.2 Use the graph paper provided by your teacher to draw graphs of V versus p and V versus  $\frac{1}{p}$ .

(18)

4. Conclusion

4.1 Examine the results in your table as well as the two graphs you have drawn, what happens to the volume of the gas in the tube as the pressure is decreased.

(1)

4.2 Write down a conclusion for this experiment.

Great Britain: Parliament: House of Lords: Science and Technology Committee,2006-11-05 The Committee s report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14 19 year old students based on the International Baccalaureate This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics

Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers the quality of careers advice in schools and the importance of practical science in schools *School and Society* James McKeen Cattell, Raymond Walters, 1916 Leading With Data Ellen Goldring, Mark Berends, 2008-09-17 Goldring and Berends provide practical and strategic counsel on what data should be collected how data can be productively analyzed and who should be involved Their book positions this advice deftly in research on leadership and organizational change As school leaders confront the challenges of meeting the needs of all students through continuous school improvement they will find this book an essential resource Willis D Hawley Professor of Education and Public Policy University of Maryland A comprehensive practical guide to using data effectively for school improvement For any educator focused on enhancing student outcomes and schoolwide performance results knowing how to collect appropriate data isn't necessarily enough Understanding how to analyze and use data as a pathway to improvement is the key This comprehensive hands on guidebook discusses the essential statistical and assessment information that principals need to know what types of data to look at how to analyze the information and how to use what they've learned to make critical choices for teaching and learning Full of examples and recommendations this book illustrates proactive strategies for collecting data and generating change while focusing on other measures of learning and school organization including data about professional development allocation of resources family involvement and community standards Part of the Leadership for Learning series this resource Provides leaders with support in developing and sustaining schoolwide capacity for continuous improvement Links data based decision making with accountability issues and shared mission and goals Includes numerous examples and cases a glossary school improvement template sample forms and data tools Leading With Data demonstrates how administrators can apply knowledgeable analysis of meaningful data for continuous sustainable and significant school improvement
