Physical Science Paper November 2012:

The Physical University Paul Temple, 2014-03-21 The great universities of the world are to a large extent defined in the public imagination by their physical form when people think of a university they usually think of a distinctive place rather than about say the teaching or the research that might go on there This is understandable both because universities usually stay rooted to the same spot over the centuries and because their physical forms may send powerful messages about the kind of places they are The physical form of the university and how the spaces within it become transformed by their users into places which hold meanings for them has become of increased interest recently from both academic and institutional management perspectives when trying to understand more about how universities work and how they may be made more effective Yet despite its seemingly obvious importance the available literature on space and place in higher education internationally is scant when compared to that dealing with say teaching and learning methods or with evaluating quality or many other topics This book brings together a range of academic and professional perspectives on university spaces and places and show how technical matters of building design maintenance and use interact with academic considerations on the goals of the university Space issues are located at an intellectual crossroads where widely differing conceptual and professional perspectives meet and need to be integrated and this important book brings together perspectives from around the world to show design and use issues are changing Higher Education Globally higher education is being required to do more things to teach more students to be better at research to engage more with business and communities and many other things These pressures are leading universities to reconsider their management processes as well as their academic structures an often quoted saying is that we make our buildings and afterwards they make us At a time when universities and colleges are seeking competitive advantages ideas and analysis about space design and use is much needed and will be well received

Therapeutic targeting of circulating tumor cells Michael R. King, There has been increased interest in circulating tumor cells CTC as a diagnostic readout of disease progression and a tool for personalized medicine The next generation of therapy for metastatic cancer may well involve neutralizing CTC as a means to prevent metastasis In this topic we focus on recent research exploring this concept

Lea, 2013-10-08 Literacy in the Digital University is an innovative volume bringing together perspectives from two fields of enquiry and practice literacies and learning and learning technologies With their own histories and trajectories these fields have seldom overlapped either in practice theory or research In tackling this divide head on the volume breaks new ground It illustrates how complementary and contrasting approaches to literacy and technology can be brought together in productive ways and considers the implications of this for practitioners working across a wide range of contexts The book showcases work from well respected authorities in the two fields in order to provide the foundations for new conversations about learning and practice in the digital university It will be of particular relevance to university teachers and researchers educational developers and learning technologists library staff university managers and policy makers and not least learners themselves particularly those studying at post graduate level Corporate Strategy in the Age of Responsibility Peter

McManners, 2016-05-13 As the era of ever expanding markets and ample resources ends governments and business will have to behave differently The world is facing weak economic growth limits to affordable resources and increasing concerns about environmental consequences During the boom times governments championed de regulation and business responded by adopting an anything goes attitude In these straitened times strategic analysis has to engage with the challenges that society faces to create resilient corporations fit for the 21st century In Corporate Strategy in the Age of Responsibility Peter McManners who has for nine years run strategy workshops on the Henley MBA focusing on the global business environment sets about providing a strategic framework for navigating the new economic environment Chief Sustainability Officers CSOs now exist but they struggle to find the strategic rationale for the improvements they champion The author argues that their good intentions often lack traction partly because others in management don t get it but also because they are not ambitious enough The book is not about preaching semi charitable behaviour or how to enhance the reputation of the corporation instead it is about surviving and thriving in a challenging and changing environment A corporate audience familiar with strategy books will relate to this book but will find it steers them towards radically new strategic thinking suitable for a turbulent period of transition Climate Change in the Media James Painter, 2013-08-19

Scientists and politicians are increasingly using the language of risk to describe the climate change challenge Some researchers have argued that stressing the risks posed by climate change rather than the uncertainties can create a more helpful context for policy makers and a stronger response from the public However understanding the concepts of risk and uncertainty and how to communicate them is a hotly debated issue In this book James Painter analyses how the international media present these and other narratives surrounding climate change He focuses on the coverage of reports by the Intergovernmental Panel on

Climate Change IPCC and of the melting ice of the Arctic Sea and includes six countries Australia France India Norway the UK and the USA Earth at Risk in the 21st Century: Rethinking Peace, Environment, Gender, and Human, Water, Health, Food, Energy Security, and Migration Úrsula Oswald Spring, 2020-04-03 Earth at Risk in the 21st Century offers critical interdisciplinary reflections on peace security gender relations migration and the environment all of which are threatened by climate change with women and children affected most Deep rooted gender discrimination is also a result of the destructive exploitation of natural resources and the pollution of soils water biota and air In the Anthropocene the management of human society and global resources has become unsustainable and has created multiple conflicts by increasing survival threats primarily for poor people in the Global South Alternative approaches to peace and security focusing from bottom up on an engendered peace with sustainability may help society and the environment to be managed in the highly fragile natural conditions of a hothouse Earth Thus the book explores systemic alternatives based on indigenous wisdom gift economy and the economy of solidarity in which an alternative cosmovision fosters mutual care between humankind and nature Special analysis of risks to the survival of humankind in the 21st century Interdisciplinary studies on peace security gender and environment related to global environmental and climate change Critical reflections on gender relations peace security migration and the environment Systematic analysis of food water health energy security and its nexus Alternative proposals from the Global South with indigenous wisdom for saving Mother Earth Too Much is Not Enough!
