**Computable** André Greiner-Petter,2022-12-31 This Open Access book addresses the issue of translating mathematical expressions from LaTeX to the syntax of Computer Algebra Systems CAS Over the past decades especially in the domain of Sciences Technology Engineering and Mathematics STEM LaTeX has become the de facto standard to typeset mathematical formulae in publications Since scientists are generally required to publish their work LaTeX has become an integral part of today s publishing workflow On the other hand modern research increasingly relies on CAS to simplify manipulate compute and visualize mathematics However existing LaTeX import functions in CAS are limited to simple arithmetic expressions and are therefore insufficient for most use cases Consequently the workflow of experimenting and publishing in the Sciences often includes time consuming and error prone manual conversions between presentational LaTeX and computational CAS formats To address the lack of a reliable and comprehensive translation tool between LaTeX and CAS this thesis makes the following three contributions First it provides an approach to semantically enhance LaTeX expressions with sufficient semantic information for translations into CAS syntaxes Second it demonstrates the first context aware LaTeX to CAS translation framework LaCAST Third the thesis provides a novel approach to evaluate the performance for LaTeX to CAS translations on large scaled datasets with an automatic verification of equations in digital mathematical libraries This is an open access book Document Analysis and Recognition , 7th International Conference On ,2003 This two volume set presents the proceedings of the 7th International Conference on Document Analysis and Recognition ICDAR 2003

Applications of Mathematics in Science and Technology Bui Thanh Hung,M. Sekar,Ayhan ESI,R. Senthil Kumar,2025-04-29 The Conference dealt with one of the most important problems faced in International development in Pure Mathematics and Applied mathematics development in engineering such as Cryptography Cyber Security Network Operations Research Heat Equation and so forth The aim of the conference was to provide a platform for researchers engineers academicians as well as industrial professionals to present their research results and development activities in Pure and Apply Mathematics and its applied technology It provided opportunities for the delegates to exchange new ideas and application experiences to establish business or research relations and to find global partners for future collaboration

Computer Analysis of Images and Patterns André Gagalowicz,2005-08-30 This volume presents the proceedings of the 11th International Conference on Computer Analysis of Images and Patterns CAIP 2005 This conference ries started about 20

years ago in Berlin Initially the conference served as a forum for meetings between scientists from Western and Eastern block countries Nowadays the conference attracts participants from all over the world The conference gives equal weight to posters and oral presentations and the selected presentation mode is based on the most appropriate communication medium The program follows a single track format rather than parallel sessions Non overlapping oral and poster sessions ensure that all attendees have the opportunity to interact personally with presenters As for the numbers we received a total of 185 submissions All papers were reviewed by two to four members of the Program Committee The final selection was carried out by the Conference Chairs Out of the 185 papers 65 were selected for oral presentation and 43 as posters CAIP is becoming well recognized internationally and this year's presentations came from 26 different countries South Korea proved to be the most active scientifically with a total of 16 accepted papers At this point we wish to thank the Program Committee and additional referees for their timely and high quality reviews The paper's mission and review procedure was carried out electronically We also thank the invited speakers Reinhardt Koch and Thomas Vetter for kindly accepting to present invited papers
