

Portlanders will use Ranked-Choice Voting in November 2024

With ranked-choice voting, instead of selecting just one candidate, you rank candidates in order of preference.

[illegible]

When filling out your ballot, mark your 1st choice under Rank 1, mark your 2nd choice under Rank 2, and so on. You can rank as many as six or as few as one, knowing that ranking more choices simply provides backups if your favorite candidate is out of the race. Only put a single oval in each row and column.

Portlanders will use ranked-choice voting to elect their district's three councilors, the mayor and the auditor.

Bruce Stephenson,2021-03-10 Iconic urbanist Lewis Mumford stressed the role of a well constructed city in the development of the good life championing pedestrian scaled sustainable cities In *Portland's Good Life* R Bruce Stephenson examines how Portland the one city in America that adopted Mumford's vision became a model city for living the good life Stephenson traces Portland's success to its grass roots governing system its housing and climate protection initiatives and most of all its citizens devoted to the public good all of which have resulted in the construction of a city that honors the humanity of its people

Land Use Planning Roger W. Caves,1992 Increasingly people are turning to the ballot box to decide questions of land use policy in many parts of the United States Have the citizens lost faith in the decisions of their elected officials Are they turning to the ballot box as a last resort or do they simply want to participate more in deciding matters that will impact their lives In this timely volume Roger Caves discusses how direct democracy has evolved in the United States the reasons for its use in a land use planning context and some of the legal issues surrounding its use The topic of ballot box planning has never been treated in such detail as Caves does in this original examination Case studies of Barnstable County Massachusetts Portland Maine San Diego California and Seattle Washington illustrate both successful and unsuccessful ballot measures concerned with land use issues Political socio economic and environmental concerns are profiled throughout the case studies Professionals and students in public policy American politics urban studies and planning will enjoy this insightful volume I found Cave's book an especially welcome contribution because it fills a significant gap in the literature on the relationship between direct democracy and growth management It is the only book that I know of on the subject *Journal of Planning Education and Research* USED AS A WHOLE THIS QUOTE IS REDUNDANT CUT WHEN USING Roger Caves work describes the efforts of citizens to use direct democracy in growth management efforts The book is unique in both its focus on local substate use of this tool and in its analysis of the direct democracy movement as it applies to the regulatory processes of local government the book specifically addresses the issues and techniques used in the direct democracy movement as applied to growth management and land use Organized in a progressive manner from general to specific the book's structure enhances its usefulness highly readable It does aid in understanding the processes and tools of direct democracy and their applications in modern society Further the author puts to rest some of the myths surrounding the concept of voter activism

Reforming Legislatures

Peverill Squire, 2024-06-26 Winner of the 2025 Virginia Gray Book Award APSA Section 22 State Politics and Policy

Legislatures are ubiquitous in the American political experience First created in Virginia in 1619 they have existed continuously ever since Indeed they were established in even the most unlikely of places notably in sparsely populated frontier settlements and functioned as the focal point of every governing system devised Despite the ubiquity of state legislatures we know remarkably little about how Americans have viewed them as organizations in terms of their structures rules and procedures But with the rise of modern public opinion surveys in the twentieth century we now have extensive data on how Americans have gauged legislative performance throughout the many years That said the responses to the questions pollsters typically pose reflect partisanship policy and personality Generally respondents respond favorably to legislatures controlled by their own political party and those in power during good economic times Incumbent lawmakers get ratings boosts from having personalities home styles that mesh with those of their constituents These relationships are important indicators of people s thoughts regarding the current performance of their legislatures and legislators but they tell us nothing about attitudes toward the institution and its organizational characteristics This study offers a unique perspective on what American voters have historically thought about legislatures as organizations and legislators as representatives Rather than focusing on responses to surveys that ask respondents how they rate the current performance of lawmakers and legislatures this study leverages the most significant difference between national and state politics the existence of ballot propositions in the latter At the national level Americans have never had any say over Congress s structure rules or procedures In contrast at the state level they have had ample opportunities over the course of more than two centuries to

shape their state legislatures The data examined here look at how people have voted on more than 1 500 state ballot propositions targeting a wide array of legislative organizational and parliamentary features By linking the votes on these measures with the public debates preceding them this study documents not only how Americans viewed various aspects of their legislatures but also whether their opinions held constant or shifted over time The findings reported paint a more nuanced picture of Americans attitudes toward legislatures than the prevailing one derived from survey research When presented with legislative reform measures on which concrete choices were offered and decisions on them had to be made the analyses presented here reveal that counter to the conventional wisdom that people loved their representatives but hated the legislature voters usually took charitable positions toward the institution while harboring skeptical attitudes about lawmakers motives and behaviors
