Martin, 2018-02-26 This selection of essays by Luther Martin brings together studies from throughout his career both early as well as more recent in the various areas of Graeco Roman religions including mystery cults Judaism Christianity and Gnosticism It is hoped that these studies which represent spatial communal and cognitive approaches to the study of ancient religions might be of interest to those concerned with the structures and dynamics of religions past in general as well as to scholars who might with more recent historical research confirm evaluate extend or refute the hypotheses offered here for that is the way scholars work and by which scholarship proceeds **Telling Stories Differently** Janet Condy, 2015-09-01 The aim of this book is to share a relatively loose collection of studies using digital storytelling as a pedagogical tool in Cape Peninsula University of Technology CPUT The book takes an informed social justice approach to teaching and learning at the heart of which is the exploration of DST as a practice of voice and agency Voice and agency are

important in excavating and recovering subjugated identities and moving the concerns of those occupying subaltern spaces to the mainstream of teaching and learning Yet this discursive shift is not without inherent challenges Multi modal technologies are reflective of wider inequities in the so called technological divide Whilst this is a book about higher education there are important lessons for schooling On the one hand the book is a powerful demonstration of the potential of DST for enhancing learning in schools particularly in schools serving the poor and marginalised On the other hand improving teaching and learning in higher education through the creative use of technology is essential to overcome the learning challenges of those entering tertiary level institutions

Weird Olga Khazan, 2020-04-07 Learn why the concept of weird is being reclaimed and turned into a badge of honor used to show how being different culturally socially physically or mentally can be a person's greatest strength Most of us have at some point in our lives felt like an outsider sometimes considering ourselves too weird to fit in Growing up as a Russian immigrant in West Texas Olga Khazan always felt there was something different about her This feeling has permeated her life and as she embarked on a science writing career she realized there were psychological connections between this feeling of being an outsider and both her struggles and successes later in life She decided to reach out to other people who were unique in their environments to see if they had experienced similar feelings of alienation and if so to learn how they overcame them *Weird* is based on in person interviews with many of these individuals such as a woman who is professionally surrounded by men a liberal in a conservative area and a Muslim in a predominantly Christian town In addition it provides actionable insights based on interviews with dozens of experts and a review of hundreds of scientific studies *Weird* explores why it is that we crave conformity how that affects people who are different and what they can do about it First the book dives into the history of social norms and why some people hew to them more strictly than others Next Khazan explores the causes behind and the consequences of social rejection She then reveals the hidden upsides to being weird as well as the strategies that people who are different might use in order to achieve success in a society that values normalcy Finally the book follows the trajectories of unique individuals who either decided to be among others just like them to stay weird or to dwell somewhere in between Combining Khazan's own story with those of others and with fascinating takeaways from cutting edge psychology research *Weird* reveals how successful individuals learned to embrace their weirdness using it to their advantage

Mathematics Matters in Education Yeping Li, W. James Lewis, James J. Madden, 2017-10-03 This book is inspired by Roger E Howe's contributions to the international communities of mathematics and mathematics education Renowned for his research contributions in the fields of representation theory automorphic forms harmonic analysis and invariant theory Dr Howe has also fundamentally deepened our understanding of the mathematics taught in the early school grades and has challenged and stimulated mathematicians and mathematics educators to work together to examine this part of the mathematical universe more critically and in imaginative new ways This volume will help summarize and highlight Howe's contributions to several topic areas in

Promoting Law Student and Lawyer Well-Being in Australia and Beyond Rachel Field, James Duffy, Colin James, 2016-04-14 University can be a psychologically distressing place for students Empirical studies in Australia and the USA highlight that a large number of law students suffer from psychological distress when compared to students from other disciplines and members of the general population This book explores the significant role that legal education can play in the promotion of mental health and well being in law students and consequently in the profession The volume considers the ways in which the problems of psychological distress amongst law students are connected to the way law and legal culture are taught and articulates curricula and extra curricula strategies for promoting wellbeing for law students With contributions from legal academics

legal practitioners and psychologists the authors discuss the possible causes of psychological distress in the legal community and potential interventions that may increase psychological well being This important book will be of interest to legal academics law students members of the legal profession post graduate researchers as well as non law researchers interested in this area **Knowledge and Networking** Anton Oleinik,2014-05-31 Success and career growth in academic life depend

upon reaching and influencing the widest audience possible To do so scientists strive to develop personalized trust They do so by establishing a large number of connections through networking and also through the strength of their arguments and the validity and reliability of their research To secure increasingly rare tenure positions and achieve salary increases promotions and recognition scholars place themselves on a continuum of priorities ranging from total emphasis on networking to complete focus on advancing knowledge trying to find some middle ground between the two extremes Anton Oleinik argues that when scholars prioritize networking science reproduces features of a small world in which personal connections prevail Who knows whom matters more than who knows what In this scenario one s status derives more from affiliation with a specific group of scholars or a particular university than from contributing to advancing knowledge Acknowledging that it would be a mistake to consider networking the main source of evils in science Oleinik instead criticizes the decisions scholars make while struggling to find that middle ground between networking and advancing knowledge and managing conflicts between these priorities The fierce competition for increasingly scarce research funds and the difficulty of finding jobs in academia underlines the growing importance of the choices made by an academic Though Oleinik focuses particularly on the social sciences his ideas are just as relevant to other disciplinary areas Managing People in

Commercial Kitchens Charalampos Giousmpasoglou,Evangelia Marinakou,Anastasios Zopiatis,John Cooper,2022-01-17 Managing People in Commercial Kitchens A Contemporary Approach uses original research to argue that senior managers head chefs should differentiate their people management practices in kitchen brigades from those used in the hospitality industry more generally induction socialisation and performance evaluation due to the group s strong occupational identity and culture The understanding of chefs work from a management perspective is critical for successful hospitality operations but has been historically under researched Chapters provide a detailed account of chefs work in commercial kitchens from an HRM perspective Using occupational identity and culture as a vehicle this book explores the different aspects of managerial work in commercial kitchen settings general management leadership education and training skills and competencies managing deviant behaviour managing stress and managing diversity focused on gender segregation The final chapter looks at future perspectives on this unique working environment and the many challenges arising from the latest developments such as the COVID 19 pandemic Providing both theoretical insights and practical applications with the use of case studies throughout this will be of great interest to upper level students and researchers in hospitality as well as a useful reference for current managers in the field **Digital Transformations of Illicit Drug Markets** Meropi Tzanetakis,Nigel
