

How to write an academic introduction

Fair Trade negatively impacts producers and workers in developing countries. To what extent do you agree?

- International trade has been predominately controlled by developed countries for centuries and developed countries have struggled to access this market. Fair Trade is a worldwide initiative aimed at improving the livelihood of producers and empowering workers in developing countries by generating better terms and sufficient wages (Fair Trade International, 2017). Overall, Fair Trade develops increased economic stability, higher salaries compared to conventional producers and educates community diversification, to a large extent the claim that Fair Trade negatively impacts producers and workers in developing countries is invalid. This essay will focus on the main arguments connected to stability, salaries and diversification and conclude with suggestions on how Fair Trade could be improved.

First sentence

A general statement that does not include the main focus but introduces the issue / controversy for the argument

Definition

A paraphrased definition (don't copy/reference source)

Thesis – include question words and show your sections / key arguments of the essay (stability, salaries, diversification)

Outline – MUST explain what the essay structure will do and the outcome / conclusion

Kirschner,Maren Scheffel,Stefanie Lindstaedt,Vania Dimitrova,2010-09-15 These proceedings of the fth European Conference on Technology Enhanced Learning EC TEL 2010 exemplify the highly relevant

and successful research being done in TEL. Because of this great work this year's conference focused on Sustaining TEL: From Innovation to Learning and Practice. The last decade has seen significant investment in terms of time, people, and money in innovating education and training. The time has come to make the bold step from small scale innovation research and development to large scale and sustainable implementation and evaluation. It is time to show the world – government, industry, and the general population – that our field has matured to the stage that sustainable learning and learning practices both in schools and in industry can be achieved based upon our work. The present day TEL community now faces new research questions related to large scale deployment of technology enhanced learning supporting individual learning environments through mashups and social software, new approaches in TEL certification and so forth. Furthermore, new approaches are required for the design, implementation, and use of TEL to improve the understanding and communication of educational desires and the needs of all stakeholders ranging from researchers to learners, tutors, educational organizations, companies, the TEL industry, and policy makers. And the TEL community has taken up this challenge. As one can see in this volume in its fifth year, the conference was once more able to assemble the most prominent and relevant research results in the TEL area. The conference generated more than 150 submissions which demonstrate a very lively interest in the conference theme, thus significantly contributing to the conference's success.

Building educational management and technology for an equitable global civilization requires a multifaceted approach taking into account the various cultural, economic, and political factors that shape the world. Building educational management and technology for an equitable global civilization requires a comprehensive and systemic approach that takes into account the needs and well-being of all individuals, communities, and the environment. A just and equitable global civilization must be built on sustainable practices that guarantee the preservation of natural resources and the environment. A just civilization must ensure that all individuals have access to resources, opportunities, and basic needs such as food, shelter, and health care. Building educational management and technology for an equitable global civilization requires building that takes into account the needs of marginalized communities and addresses systemic inequalities. Building a just civilization must be transparent and accountable with clear processes and structures for decision making and resource allocation. This includes involving community members in decision making processes and providing clear communication about building and resource management. A just civilization must ensure that individuals are safe and physically protected in their buildings and communities. This includes ensuring that buildings are structurally sound and meet safety codes as well as implementing

safety measures to protect individuals from harm Building education management and technology should prioritize community ownership and involvement creating spaces and opportunities for individuals to come together connect and support one another Overall building educational management and technology for an equitable global civilization requires a commitment to sustainability inclusiveness transparency security and community building By prioritizing these values we can create a more just and equitable world for all Building educational management and technology for an equitable global civilization needs to continue to encourage the creation of an environment where everyone feels accepted valued and supported This means promoting diversity equity and inclusion in all aspects of organizational and educational practice It also means taking steps to eliminate bias discrimination
