

THERAPY CONSENT FORM

Welcome to the practice. This document contains important information about professional services and business policies. Please read it carefully and jot down any questions you might have so that we can discuss them at our next meeting. When you sign this document, it will represent an agreement between us.

1. **PSYCHOLOGICAL SERVICES.** Psychotherapy is not easily described in general statements. It varies depending on the personalities of the psychologist and patient, and the particular problems you hope to address. There are many different methods I may use to deal with those problems. Psychotherapy is not like a medical doctor visit. Instead, it calls for a very active effort on your part. In order for the therapy to be most successful, you will have to work on things we talk about both during our sessions and at home.

Psychotherapy can have benefits and risks. Because therapy often involves discussing unpleasant aspects of your life, you may experience uncomfortable feelings like sadness, guilt, anger, frustration, loneliness, and helplessness. On the other hand, psychotherapy has also been shown to have benefits for people who go through it. Therapy often leads to better relationships, solutions to specific problems, and significant reductions in feelings of distress. But, there are no guarantees as to what you will experience.

Our first few sessions will involve an evaluation of your needs. By the end of the evaluation, I will be able to offer you some first impressions of what our work will include and a treatment plan to follow, if you decide to continue with therapy. You should evaluate this information along with your own opinions about whether you feel comfortable working with me. At the end of the evaluation, I will notify you if I believe that I am not the right therapist for you and, if so, I will give you referrals to other practitioners whom I believe are better suited to help you.

Therapy involves a large commitment of time, money, and energy, so you should be very careful about the therapist you select. If you have questions about my procedures, we should discuss them whenever they arise. If your doubts persist, I will be happy to help you set up a meeting with another mental health professional for a second opinion.

2. **MEETINGS.** I normally conduct an evaluation that will last from ____ to ____ sessions. During this time, we can both decide if I am the best person to provide the services you need in order to meet your treatment goals. If we agree to begin psychotherapy, I will usually schedule one _____ session per week, at a time we agree on, although some sessions may be longer or more frequent. Once an appointment hour is scheduled, you will be expected to pay for it unless you provide _____ hours advance notice of cancellation unless we both agree that you were unable to attend due to circumstances beyond your control. If it is possible, I will try to find another time to reschedule the appointment.

Bureau of Library and Information Services, 2000 The Use of Psychological Testing for Treatment Planning and Outcomes Assessment Mark E.

Maruish, 2004-07-19 Test based psychological assessment has been significantly affected by the health care revolution in the United States during the past two decades. Despite new limitations on psychological services across the board and psychological testing in particular, it continues to offer a rapid and efficient method of identifying problems, planning and monitoring a course of treatment, and assessing the outcomes of interventions. This thoroughly revised and greatly expanded third edition of a classic reference, now three volumes, constitutes an invaluable resource for practitioners who in a managed care era need to focus their testing not on the general goals of personality assessment, symptom identification, and diagnosis so often presented to them as students and trainees, but on specific questions: What course of treatment should this person receive? How is it going? Was it effective? New chapters describe new tests and models and new concerns such as ethical aspects of outcomes assessment. Volume I reviews general issues and recommendations concerning the use of psychological testing for screening for psychological disturbances, planning and monitoring appropriate interventions, and the assessing outcomes, and offers specific guidelines for selecting instruments. It also considers more specific issues such as the analysis of group and individual patient data, the selection and implementation of outcomes instrumentation, and the ethics of gathering and using outcomes data. Volume II discusses psychological measures developed for use with younger children and adolescents that can be used for the purposes outlined in Volume I. Volume III, those developed for use with adults. Drawing on the knowledge and experience of a diverse group of leading experts, test developers, researchers, clinicians, and others, the third edition of *The Use of Psychological Testing for Treatment Planning and Outcomes Assessment* provides vital assistance to all clinicians and to their trainees and graduate students.
