Committee on Energy and Commerce, 2009 **Engineering the Financial Crisis** Jeffrey Friedman, Wladimir Kraus, 2011-09-01 The financial crisis has been blamed on reckless bankers irrational exuberance government support of mortgages for the poor financial deregulation and expansionary monetary policy Specialists in banking however tell a story with less emotional resonance but a better correspondence to the evidence the crisis was sparked by the international regulatory accords on bank capital levels the Basel Accords In one of the first studies critically to examine the Basel Accords **Engineering the Financial Crisis** reveals the crucial role that bank capital requirements and other government regulations played in the recent financial crisis Jeffrey Friedman and Wladimir Kraus argue that by encouraging banks to invest in highly rated mortgage backed bonds the Basel Accords created an overconcentration of risk in the banking industry In addition accounting regulations required banks to reduce lending if the temporary market value of these bonds declined as they did in 2007 and 2008 during the panic over subprime mortgage defaults The book begins by assessing leading theories about the crisis deregulation bank compensation practices excessive leverage too big to fail and Fannie Mae and Freddie Mac and through careful evidentiary scrutiny debunks much of the conventional wisdom about what went wrong It then discusses the Basel Accords and how they contributed to systemic risk Finally it presents an analysis of

social science expertise and the fallibility of economists and regulators Engagingly written theoretically inventive yet empirically grounded Engineering the Financial Crisis is a timely examination of the unintended and sometimes disastrous effects of regulation on complex economies
