

Samples of Opening Paragraphs for a Short Philosophy Paper

For illustrative purposes only

In what follows, you'll read 3 samples of opening paragraphs. The last example is a whole paper (on a topic totally different from ours), and it is a bit more sophisticated than what you are required to do. However, take a look at the structure and language: how concise and exact everything is. All of these samples are grade A material (the very last one is an A+). They all follow the basic structure I talked about.

The difference between an introduction like the one I was recommending not to write and this type of opening paragraph should be clear: If you want to call the opening paragraph an introduction, that's fine with me: all I want to stress is that you need to **get right to the point, stating the thesis of your essay, the side you'll be taking** (agree or disagree with the thesis) **and the reasons why you're taking that side**. After each sample below, I'll provide a short commentary of why I think that's a good opening / paper.

• Sample 1

Socrates on the Moral Authority of the State

In the *Crito*, Socrates makes some surprisingly strong claims about the moral authority of the state, which might even seem to be inconsistent both with another fundamental claim he makes in the *Crito* and with certain claims he makes in the *Apology*. I shall argue that although these claims seem to be in some tension with each other, the crucial claims about the authority of the state in the *Crito* can plausibly be interpreted in such a way as to remove any real inconsistency with the other claims.

Commentary: The opening paragraph is very concise, but very nicely written. The problem is plainly stated, and then I explain clearly what I'm going to do in the paper--all in just two sentences. There's no rambling introduction with sentences starting with "Since the beginning of time, mankind has pondered the mysteries of etc."

The style is straightforward, striving for clarity rather than literary flair. Jargon is avoided as far as possible.

However, the sentences are a bit too long for my taste. Try to avoid wordy sentences.

• Sample 2

Changing the Laws of Physics

Peter Van Inwagen ambitiously sets out to prove once and for all that we must choose between free will and determinism, because both cannot hold for this world. In "Determinism", he defines both determinism and free will, and gives a deductive argument for how these two ways of the world cannot coexist. His argument nearly succeeds, but for one error. In this paper, I will show how his conception of determinism fails simply because the "laws of physics" he envisions are problematic. In order for his "laws of physics" to work in the argument, they must be independent rules for understanding our world, but Van Inwagen does not give sufficient reason to interpret them as such.

Writing Philosophy Papers Zachary Seech, 1993 WRITING PAPERS IN PHILOSOPHY is an inexpensive supplement covering the various kinds of writing assignments for which many of today's students are ill prepared. Teachers can rest assured that students now have the resources to learn the various skills e.g. organization, documentation, how to write a thesis defense or comparison and contrast paper. This book will save time and frustration for everyone concerned. **Writing Philosophy** Lewis Vaughn, 2018 Writing Philosophy: A Student's Guide to Reading and Writing Philosophy Essays, Second Edition is a concise self-guided manual that covers how to read philosophy and the basics of argumentative essay writing. It encourages students to master fundamental skills quickly with minimal instructor input and provides step-by-step instructions for each phase of the writing process from formulating a thesis to creating an outline to writing a final draft, supplementing this tutorial approach with model essays, outlines, introductions, and conclusions. Writing Philosophy Papers Zachary Seech, Andrew Kania, 2024-08-28 This sixth edition of Writing Philosophy Papers updates and expands one of the most popular guides to philosophical writing assignments for undergraduate students. Written in a clear, straightforward style, the book covers everything from time management to the difference between i.e. and e.g. The heart of the book is devoted to how to write a thesis defense paper, with chapters on the structure of a strong paper, the process of writing and revising, matters of style and usage, and scholarly citation. This advice is illustrated with concrete examples throughout, including a complete thesis defense paper written and formatted according to the book's recommendations. The book also covers how to take good notes from various kinds of philosophical sources, how to write other commonly assigned kinds of papers, and how to study for and take a philosophy exam. A chapter on doing philosophical research contains practical advice on how to discover and access the most helpful sources for a philosophical research paper or annotated bibliography. Because virtually every philosophy assignment requires a basic grasp of arguments, the book ends with a chapter introducing some basic concepts and skills for reasoning well. The heart of the sixth edition has been revised and restructured to lead students even more clearly through the process of drafting, revising, and formatting a thesis defense paper. This new edition also includes an updated, completely revised and expanded chapter on citing sources, giving equal consideration to print and online sources; an updated, completely revised and expanded chapter on doing philosophical research, focused on how to find the most helpful sources for completing a philosophical research paper or annotated bibliography; updated, revised, and greatly expanded advice on writing style and usage; a completely revised and expanded treatment of good reasoning, with a new discussion of inductive and abductive reasoning; and new advice on how to take good notes and how to study for and take philosophy exams. **Score Plus CBSE Sample Question Paper with Model Test**

point slope equation of a line math is fun - Jun 20 2023

point slope equation of a line the point slope form of the equation of a straight line is $y - y_1 = m(x - x_1)$ the equation is useful when we know one point on the line (x_1, y_1) and the slope of the line m and want to find other points on the line have a play with it move the point try different slopes now let's discover more

point slope form definition equation example study com - Nov 13 2022

examples example 1 find an equation of the line with a slope of 3 that passes through the point $(2, 4)$ the slope of 3 tells us to replace the m with 3 the point $(2, 4)$ tells us that $x - 2$

point slope form of a line mathwarehouse com - Jan 15 2023

overview of different forms of a line's equation there are many different ways that you can express the equation of a line there is the slope intercept form standard form and also this page's topic point slope form each one expresses the equation of a line and each one has its own pros and cons point slope form this page's topic makes it easy to find the line's

intro to point slope form algebra video khan academy - Aug 22 2023

the point slope form is very useful when you don't have your y intercept it is used to write equations when you only have your slope and a point point slope form $y - a = m(x - b)$ for example your slope m is 3 and your point a, b is $(9, 10)$ you would substitute your y coordinate for a and your x coordinate for b

point slope form simply explained w 17 examples calcworkshop - Jun 08 2022

jan 20 2020 how to find $y = mx + b$ with two points find the y intercept given two points use $y - m(x - x_1) + y_1$ to write the equation of the line given the point $(4, 5)$ and slope of 6 find y when $x = 24$ so together we are going to learn how to write the equation of a

line using point slope form represent equations from point slope form to slope intercept form

point slope form basic introduction algebra youtube - Jul 09 2022

dec 17 2022 88k views 9 months ago new algebra playlist this algebra video tutorial provides a basic introduction into point slope form it explains how to write a linear equation given a point and

point slope form explanation review and examples albert - Sep 23 2023

mar 1 2022 in this post you will learn how to determine the point slope form of a line given two points or given a point and a slope you will also see how to graph and how to determine x and y intercepts using point slope form

point slope form calculator - Jul 21 2023

aug 13 2023 point slope form is a form of a linear equation where there are three characteristic numbers two coordinates of a point on the line and the slope of the line the point slope form equation is $y - y_1 = m(x - x_1)$ where x_1 y_1 small x_1 y_1 x_1 y_1

point slope form math net - May 19 2023

point slope form point slope form is one of the more commonly used forms of a linear equation and has the following structure $y - y_1 = m(x - x_1)$ where m is the slope of the line x_1 y_1 is a point on the line and x and y are variables representing other points on the line

point slope form definition overview study com - Oct 12 2022

point slope form in point slope form which is written like this $y - y_1 = m(x - x_1)$ y_1 is the y value of the known point on the line m is the slope and x_1 is the x value of the

$y - k = m(x - h)$ where m is the slope of the line and h, k is a point on the line any point works to write an equation in point slope form given a graph of that equation first determine the slope by picking two points then pick any point on the line and write it as an ordered pair h, k

point slope form review linear equations khan academy - Feb 16 2023

point slope is a specific form of linear equations in two variables $y - b = m(x - a)$ when an equation is written in this form m gives the slope of the line and a, b is a point the line passes through this form is derived from the slope formula want to learn more about point slope form check out this video
