

7th Grade

This four station program, called "Copernik Observatory Days (KODC)" utilizes a variety of our equipment and activities. Schools are invited to choose from a variety of stations such as, our telescopes (very popular), inflatable planetarium, 3D projector called DecoWell, electronic kits, and snap-covers. This program introduces a large group of students to fun science and engineering activities. These lessons may include some of our standard lessons but will also include new lessons developed at the Teacher Summer Workshop. The entire 7th grade from both districts will participate in this event.

Scientific Skills Lab 8th Grade

For the 8th grade students, we will conduct our well tested Scientific Skills Lab. This lab has four different stations that reinforce important scientific skills. Students perform various tasks such as; measuring field-of-view under a microscope, classifying household objects, graphing momentum of a golf ball and identifying a metal using density. These stations provide a critical parallel task for the NYSE 8th Grade Performance Test.

Conclusion

The rationale for KODC staff working with schools to enhance their teaching methods is based on several principles. One is that effective teaching is derived from a sound plan that is utilizes proper equipment and is implemented by caring well-trained staff. Secondly, the needs of the students are faithfully secured by focusing on the development of proper instruction. This is accomplished by the development of a program that is aligned with the districts curriculum. Finally, these activities must involve students, teachers, and administrators by making them feel part of the whole project.

***** (End of Narrative)*****

There are additional questions on the Florida website:

Brief Summary

Copernik staff will work with teachers from two rural districts to help implement a series of science activities that will provide critically needed science instruction for grades 5-8. Teachers will design new programs and modify some of our existing programs in a two day summer workshop. Copernik staff and teachers from participating districts will then co-teach a series of classes and labs. The vast majority of activities will take place in 8th grade because the school districts have stated this grade level is of great need of intervention. Both districts have observed student interest and skills dropping off at this grade. The programs will be assessed with pre-tests and post-tests as well as student surveys. After completion of the year, we will seek funding from local corporations to maintain and expand these programs to other school districts. Although, KODC already conducts various programs with both districts, these programs are very introductory and cursory in nature. We believe that a more continued presence at both districts will provide more significant help for these underserved rural students.

Sample Stem Grant Narrative
