Boosting Field Marketing Hermawan Kartajaya, Pertempuran marketing yang sesungguhnya adalah di field. Siapa yang menang di field maka dialah yang akan sukses. Strategi secanggih apa pun tidak akan berguna jika eksekusi di lapangannya amburadul. Oleh karena itu posisi field marketing sangat penting. Apalagi pascareformasi lanskap bisnis Indonesia telah berubah total di mana semangat lokal semakin mengemuka karena otonomi daerah. Strategi marketing yang dahulunya dibuat seragam dan massal secara nasional sekarang ini terpaksa dibuat beragam agar sesuai dengan budaya dan nilai lokal. Oleh karena itu ide dari bawah sangat berharga dalam suasana seperti ini. Di sinilah peran penting seorang field marketer. Field marketer sekarang ini dituntut paham strategi selain mahir eksekusi. Technologies related to electronic music production Aaron Sequeira, 2023-06-29. We will focus on the most outstanding technologies for modern electronic music production. Therefore as in the previous book in which sections made the presentation of the instruments this volume is made up of five of them for reasons of analytical practicality: 1. Audio recording and playback 2. Speakers 3. Communication protocols between electronic instruments 4. Modern electronic music production 5. DJing. The first point will clarify how the ability to record sound in an analog mechanism was acquired just a moment ago if we compare that time with human existence. Therefore since electronic music is intrinsically linked to the technique of sound recording and its playback it is necessary to know about the technologies that have allowed this process since the 19th century. Subsequently it will be explained what the speakers are and how their role and development in electronic music have been fundamental. As has already been elucidated throughout this series it would be practically impossible for electronic music to exist without speakers. After that we will see the two main protocols of communication between electronic instruments: MIDI and OSC, in addition to expressing my point of view about their transcendence because never in the history of music in its entirety the instruments had managed to sync through messages and time automation codes under the master slave concept. Understanding the above we will review all those technologies that facilitate modern electronic music production such as a DAW, sound effects, sample manipulation etc. Finally we will explain the tools that the DJ uses to play such as turntables, CD players, controllers etc. Since each invention of these five points has its own story I will limit myself to mentioning merely basic details so that the reader can investigate more for his account, topic by topic. As in the case of this series, first and second volumes, the purpose is to establish a conceptual axis in which one can have a reference, not a detailed encyclopedia of each specific device. **Keyboard**, 2008.
