In addition to permitting specific IP addresses to have “free” network access rights without authenticating, the DSA-3200 also provides the ability to do so according to a MAC address. This system permits at most 100 Privileged MAC addresses to have network access rights without going through user authentication. The format of the MAC address is **XX:XX:XX:XX:XX:XX**. These settings will be effective immediately after you click “Apply”.

Warning: Permitting certain MAC addresses to have network access rights without going through the standard authentication process may pose a security risk.
